Section A – Basics (Short Answers)

1. What is SEO? Explain On-Page and Off-Page SEO.

SEO (Search Engine Optimization) is the process of improving a website to increase its visibility in organic (unpaid) search engine results.

- On-Page SEO: Optimizing website content, title tags, meta descriptions, headings, images, URLs, and internal links.
- Off-Page SEO: Improving website authority and reputation through backlinks, business listings, brand mentions, and other external activities.

Example: A bakery optimizing its website for “best bakery in Rajkot” is doing SEO.

2. Define keywords. What is the difference between short-tail and long-tail keywords?

Keywords are the words or phrases people enter into search engines to find information, products, or services.

Short-tail keywords	Long-tail keywords
Usually short, broad phrases	Usually longer, more specific phrases
Higher competition in many cases	Often lower competition
May have high search volume	Often have lower search volume
Example: Bakery	Example: Best birthday cake shop in Rajkot

3. What are Crawling, Indexing, and Ranking?

- Crawling: Search engine bots discover and examine website pages and links.
- Indexing: Search engines process a page's content and may store it in their search index.
- Ranking: Search engines determine which indexed pages to show and in what order for a particular search query.

4. What is a SERP? Mention any three SERP features.

SERP stands for Search Engine Results Page. It is the page displayed after a user searches for something on Google or another search engine.

Three SERP features are:

1. Featured snippets: Short answers highlighted from web pages.
2. People Also Ask: A list of related questions users can expand.
3. Local Pack: A map and local business listings for relevant searches.

5. What is Domain Authority?

Domain Authority (DA) is a third-party SEO metric developed by Moz that predicts how likely a website is to rank in search results compared with other websites.

It is scored from 1 to 100. A higher score generally indicates a stronger backlink profile, but DA is not a Google ranking factor. Other tools have their own authority metrics, such as Ahrefs Domain Rating (DR).

Section B – Practical Tasks

Task 1: Keyword Research

Selected business: Local Bakery in Rajkot

Target audience: People searching for birthday cakes, custom cakes, pastries, and bakery delivery in Rajkot.

The following keyword lists are research candidates. Exact search volumes and difficulty scores require a live keyword-tool report; I have not invented numeric tool results. Ubersuggest provides estimated monthly search volume and SEO Difficulty when a location is selected.

Ubersuggest
+1

A. 10 primary keywords

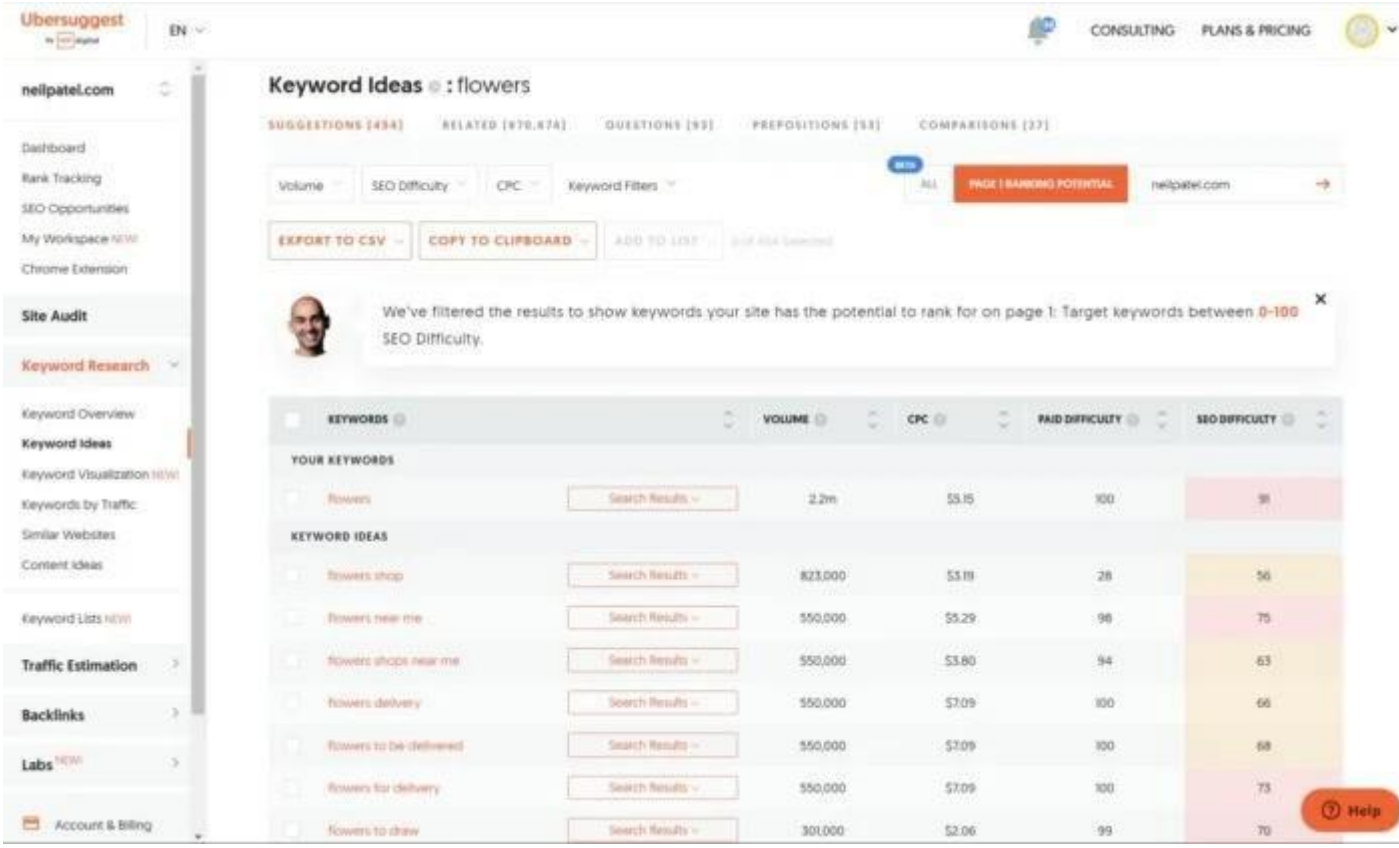

No.	Primary keyword	Search volume/month	SEO difficulty
1	Bakery	Verify in tool	Verify in tool
2	Bakery in Rajkot	Verify in tool	Verify in tool
3	Cake shop	Verify in tool	Verify in tool
4	Cake shop in Rajkot	Verify in tool	Verify in tool
5	Birthday cake	Verify in tool	Verify in tool
6	Custom cakes	Verify in tool	Verify in tool
7	Chocolate cake	Verify in tool	Verify in tool
8	Pastry shop	Verify in tool	Verify in tool
9	Online cake delivery	Verify in tool	Verify in tool
10	Bakery near me	Verify in tool	Verify in tool

B. 10 long-tail keywords

No.	Long-tail keyword	Search volume/month	SEO difficulty
1	Best bakery in Rajkot	Verify in tool	Verify in tool
2	Best birthday cake shop in Rajkot	Verify in tool	Verify in tool
3	Customised birthday cakes in Rajkot	Verify in tool	Verify in tool

10	Best bakery for pastries in Rajkot	Verify in tool	Verify in tool

Keyword research tool

Ubersuggest

Check keyword volume and SEO difficulty for India.

[Open keyword research tool]

Settings to use: Location — India; Language — English; enter each keyword or use Bulk Analysis. Copy the actual monthly volume and SEO Difficulty (SD) into the tables above. If available, use a more specific Rajkot location dataset for local terms.

Ubersuggest
+1

Task 2: On-Page SEO

Sample page: Birthday cake service page for a Rajkot bakery.

SAMPLE SEARCH RESULT

Birthday Cakes in Rajkot | Fresh Custom Cakes

https://example.com/birthday-cakes-rajkot

Order delicious birthday cakes in Rajkot, including chocolate, eggless and customised cakes. Explore designs and order your cake for a special celebration.

On-page SEO elements

Element	Recommended content
Title Tag	Birthday Cakes in Rajkot | Fresh Custom Cakes
Meta Description	Order delicious birthday cakes in Rajkot. Explore custom designs, chocolate cakes and eggless options for every celebration.
H1 Tag	Best Birthday Cakes in Rajkot
H2	Customised Birthday Cakes for Every Occasion
H2	Chocolate, Eggless and Fresh Cream Cakes
H2	How to Order Birthday Cakes in Rajkot

Image alt tags

- `custom chocolate birthday cake in Rajkot`
- `eggless birthday cake with fresh cream`
- `customised cake design for birthday celebration`

Alt text should accurately describe the image rather than repeat keywords unnecessarily.

URL structure

Recommended URL:

`https://example.com/birthday-cakes-rajkot`

Use a short, descriptive URL that reflects the page topic.

Internal and external linking plan

Internal links

- Link to the homepage using “Visit our bakery.”
- Link to the product page using “Explore chocolate cakes.”
- Link to the contact page using “Contact us to order a custom cake.”

External links

- Link to a relevant food-safety resource, such as the official FSSAI website, where useful.
- Link to trusted resources that genuinely help customers.

Internal links help users and search engines discover related pages. External links should add useful context rather than exist merely to improve SEO.

Task 3: Technical SEO Checklist

Website selected: TGB Cafe N Bakery — tgbbakery.com

The website has visible product categories and a store locator that includes Rajkot locations.

tgbbakery.com

Important: The following is a preliminary checklist, not a completed technical crawl. Scores and technical statuses must be verified using the live testing tools.

Technical SEO item	Status / result
Page Speed Score	Not yet measured
Mobile Friendliness	Needs testing on mobile
Broken Links	Needs link crawling
XML Sitemap	Needs verification
Robots.txt	Needs verification
HTTPS security	Website uses HTTPS
Title tags	Check for unique, descriptive titles
Meta descriptions	Check for missing or duplicated descriptions
Image optimization	Check image sizes and alt text
Core Web Vitals	Needs testing
Canonical tags	Needs verification
Structured data	Needs verification

Tools for verification

- Google PageSpeed Insights — performance, mobile/desktop results, and Core Web Vitals.

  PageSpeed Insights

- Google Search Console — indexing, sitemap submission, and search performance.
- Screaming Frog SEO Spider — broken links, metadata, redirects, and crawl issues.

To complete the checklist, enter the website URL in these tools and replace “Needs verification” with the actual findings.

Section C – Mini Project

SEO Audit for a Local Bakery in Rajkot

lbb.in

Business: Rajkot Bakery

Business type: Local bakery and customised cake shop

Objective: Improve local Google visibility, attract customers searching for cakes, and generate more calls, visits, and online orders.

1. SEO audit — 12 points

No.	Audit area	Recommended action
1	Keyword research	Target bakery and cake-related local keywords.
2	Title tags	Add unique titles with relevant product and location terms.
3	Meta descriptions	Write persuasive descriptions for important pages.
4	Headings	Use one clear main heading and descriptive subheadings.
5	Content quality	Add original descriptions for cakes, pastries, and bakery services.
6	Images	Compress images and write descriptive alt text.
7	Website speed	Optimize images, scripts, and caching.
8	Mobile experience	Ensure text, menus, buttons, and ordering work on mobile.

9	Technical SEO	Check indexing, sitemap, robots.txt, and canonical tags.
10	Local SEO	Maintain an accurate Google Business Profile.
11	Backlinks	Earn relevant links from local directories and community websites.
12	Analytics	Monitor organic clicks, impressions, calls, and conversions.

These are recommended audit checks; they are not claims that all 12 issues currently exist on a particular bakery website.

2. Keyword strategy table

Target keyword	Intent	Recommended page
Bakery in Rajkot	Local / commercial	Homepage
Cake shop in Rajkot	Local / commercial	Homepage or cake category
Birthday cakes in Rajkot	Transactional	Birthday cake page
Customised cakes in Rajkot	Transactional	Custom cake page
Eggless cakes in Rajkot	Transactional	Eggless cake page
Chocolate cake	Commercial	Chocolate cake category
Pastry shop in Rajkot	Local / commercial	Pastries page
Cake delivery in Rajkot	Transactional	Delivery page
Affordable birthday cakes in Rajkot	Commercial	Birthday cake category
How to choose a birthday cake	Informational	Blog article

Strategy: Prioritize location-specific, high-intent keywords for product and service pages. Use informational keywords for blog content that helps potential customers make purchasing decisions.

3. Five competitor URLs and their strengths

These are real bakery competitors or competing local discovery pages found in public listings. Their strengths below are strategic observations, not verified rankings or full website audits.

1. TGB Cafe N Bakery

Website and store locator

tgbbakery.com

Strengths: Product categories, brand presence, and a store locator covering Rajkot.

tgbbakery.com

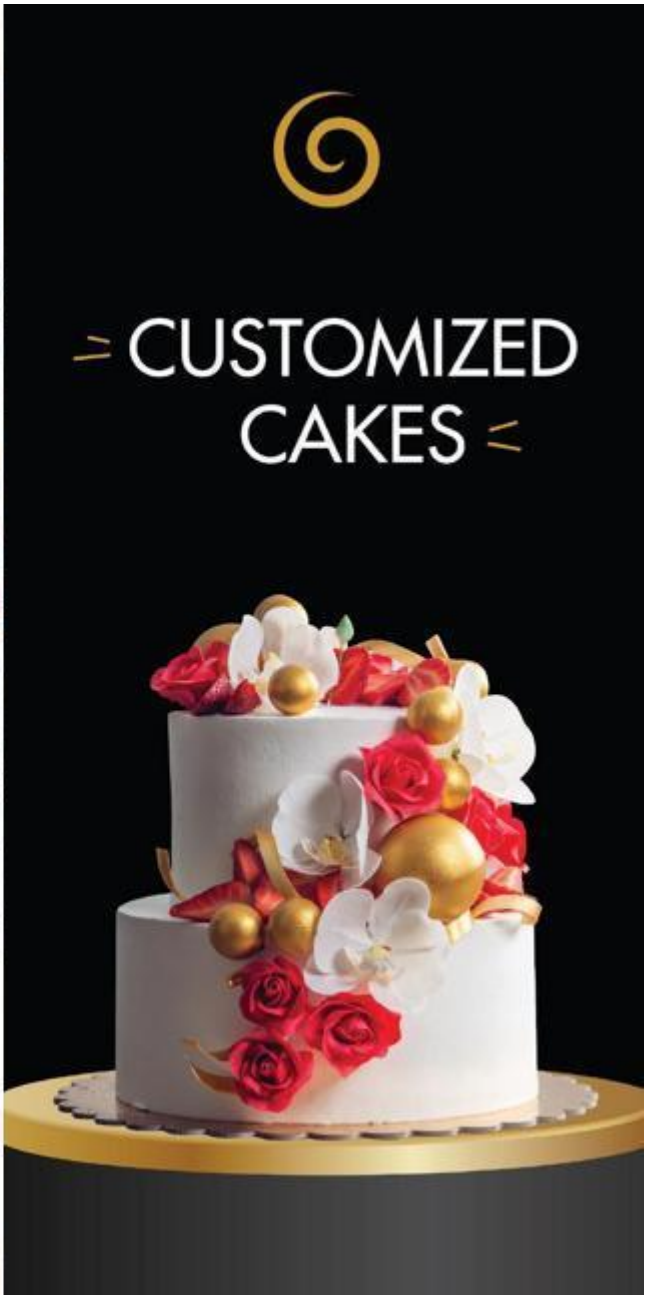

2. Monginis Cake Shop

Rajkot business listing search

Strengths: Recognizable bakery brand, cake and pastry product range, and local discovery through business listings.

Justdial
+1

3. Cake Walk

[Rajkot cake retailer listings]

Strengths: Local visibility, customer reviews, and discoverability for cake-related searches.

Jd
Justdial

4. Kaushar Bakery

Kaushar Bakery listing

Strengths: Local business listing, customer feedback, and a range of bakery products, including custom-made cakes.

Jd
Justdial

5. Shree Ghanshyam Live Cake

[Rajkot cake retailer listings]

Strengths: Local listing visibility, customer ratings, and reviews mentioning themed cake designs and timely orders.

Jd
Justdial

4. Final SEO recommendations

1. Improve local visibility: Complete the Google Business Profile with correct address, phone number, business hours, categories, and fresh product photos.
2. Create dedicated landing pages: Build separate pages for birthday cakes, customised cakes, eggless cakes, pastries, and delivery services.
3. Target local keywords: Use Rajkot-related keywords naturally in page titles, headings, content, and relevant image alt text.
4. Improve website performance: Test mobile and desktop speed, compress images, and resolve Core Web Vitals issues.
5. Fix technical problems: Check broken links, indexing, XML sitemap, robots.txt, and duplicate URLs.
6. Build local authority: Earn genuine reviews and relevant links from local directories, food bloggers, and community websites.
7. Publish useful content: Create articles about cake flavours, birthday cake selection, eggless cakes, and celebration ideas.
8. Improve conversions: Add clear order, call, WhatsApp, and directions options where applicable.
9. Track results: Use Google Search Console and Google Analytics to measure clicks, impressions, traffic, and orders.
10. Review competitors monthly: Compare their page content, local listings, backlinks, product categories, and keyword coverage.

Conclusion

SEO helps a bakery attract relevant customers without depending entirely on paid advertising. By combining keyword research, on-page optimization, technical improvements, local SEO, and performance tracking, a bakery in Rajkot can work toward better organic visibility and more customer enquiries.

Submission note: The keyword volumes, keyword difficulty values, and technical audit scores still need to be collected from the relevant tools before submitting this as a measured practical report.
