Digital Marketing Assignment

Session – 1

1. Social Media Marketing by Two Daily-Use Apps

Instagram: Instagram uses social media marketing mainly through short-form videos (Reels), Stories, influencer collaborations, hashtags, and personalized content. Brands and creators promote products through engaging visual content, while Instagram's recommendation system helps content reach new audiences. This increases brand awareness, engagement, followers, and ultimately users and customers.

Zomato: Zomato uses social media marketing through humorous posts, memes, trending topics, food-related content, and promotional campaigns. Its social media posts often connect with current events and popular culture, making them highly shareable. This helps Zomato maintain strong brand visibility, engage existing customers, and attract new users to its food-delivery and dining services.

---

2. Facebook vs Instagram vs LinkedIn for Business Marketing

Platform	Target Audience	Main Content Types	Best Business Use Case
Facebook	Broad audience, adults, communities	Posts, videos, images, Stories, groups, ads	**B2C** marketing, community building, local businesses
Instagram	Younger audiences, millennials, Gen Z, lifestyle shoppers	Reels, Stories, images, carousels, influencer content	**B2C/D2C** brands, fashion, beauty, food, lifestyle products
LinkedIn	Professionals, business owners, decision-makers	Articles, professional posts, videos, case studies, job posts	**B2B** marketing, lead generation, professional networking

Summary: Facebook is useful for broad B2C reach, Instagram is particularly strong for visual **B2C/D2C** brands, while LinkedIn is the strongest choice for **B2B** marketing.

---

3. Best Platform for a New D2C Fashion Brand in 2026

I would prioritize **Instagram** for a new D2C fashion brand in 2026. Fashion is highly visual, making Instagram ideal for showcasing products through Reels, Stories, carousels, and creator/influencer collaborations. Short-form video is expected to remain an important way for brands to capture attention and reach new audiences. Influencer and creator marketing can also provide social proof and help a new brand build trust quickly. Instagram also supports

shopping-oriented discovery, making it suitable for taking customers from **product discovery → engagement → purchase**.

For example, a new fashion brand could publish outfit Reels, collaborate with fashion creators, show customer-generated content, conduct limited-time offers through Stories, and use targeted advertising to reach potential buyers.

Therefore, Instagram would be my first choice because it combines visual content, influencer marketing, audience discovery, engagement, and D2C product promotion in one platform.

---

4. Three Differences Between B2B and B2C Social Media Marketing

Difference	B2B Marketing	B2C Marketing	Example
1. Target Audience	Targets businesses, professionals, and decision-makers	Targets individual consumers	**Microsoft** uses LinkedIn to reach businesses, while **Nike** targets individual consumers through Instagram
2. Content & Communication	More educational and professional: case studies, reports, industry insights	More emotional, entertaining, and visually attractive: Reels, offers, product posts	**HubSpot** shares marketing knowledge and business resources; **Coca-Cola** uses entertaining campaigns and lifestyle content
3. Buying Process	Usually longer because several people may be involved in the decision	Usually faster and influenced by price, trends, reviews, and emotions	A company may research **Salesforce** before purchasing software, while a consumer may see a **Nike** post and immediately decide to buy shoes

---

Digital Marketing Assignment

Session – 2

1. Comparison of Facebook Ad Types

Ad Type	Format	Ideal Use Case	Example Brand/Campaign
Static Ad	One image + primary text + headline + CTA	Simple offers, product promotion, brand awareness	**Myntra** – fashion sale/product promotion

Video Ad	Short video/Reel + text + CTA	Storytelling, demonstrations, launches, awareness	**Zomato** – food-delivery promotional videos
Carousel Ad	2–10 images/videos that users can swipe through	Show multiple products, features, or steps	**Amazon** – multiple products/category promotions
Collection Ad	Cover image/video + multiple product images, often leading to an instant shopping experience	E-commerce product discovery and shopping	**Nike** – showcasing a collection of products

In short: Static = simple message, Video = storytelling, Carousel = multiple products/features, Collection = shopping experience.

---

2. Facebook Ad Copy – New Feature Launch

App: Zomato
New feature: *Group Ordering*
Ad Type: Video Ad

Why Video?
A video can quickly demonstrate how friends can add food to the same order, making the new feature easy to understand and more engaging than a single image.

 NEW ON ZOMATO: GROUP ORDERING!

Ordering food with friends just got easier!

No more sending screenshots or deciding who orders what. Create one group order, invite your friends, and let everyone add their favorite dishes. ❤

 Everyone chooses
 One shared order
 One easy checkout

Bring your friends. Pick your food. Enjoy together!

 Try **Group Ordering** on Zomato today.

#Zomato #GroupOrdering #FoodieFriends #FoodDelivery #NewFeature

I'd use the CTA **"Try Now"** because the campaign is promoting adoption of a newly launched feature.

---

3. Real Facebook Ad Campaign Research

For research, Meta's **Ad Library** can be used to search current ads by advertiser or keyword. Meta says the library contains ads currently running across Meta technologies, and ads can be searched by keyword or advertiser.

Meta Ads Library

Example campaign: Zomato – Foodies

Target audience: Food lovers / people interested in ordering food
Likely objective: App Installs or **Sales/Conversions**

Why?

Suppose the ad contains a message such as:

"Hungry? Order your favourite food now!"

with attractive food visuals and a **"Download"**, **"Install Now"**, or **"Order Now"** CTA.

The clues suggest a performance-oriented campaign rather than simply awareness:

- **Food images** → designed to attract food lovers.
- **Offer/discount** → encourages immediate action.
- **Install/Download CTA** → suggests an **App Installs** objective.
- **Order Now CTA** → suggests **Sales/Conversions** or another action-focused objective.
- If the ad mainly promotes the brand without an action-oriented CTA, **Engagement/Awareness** would be more likely.

Important: Meta's public Ad Library does not generally reveal the advertiser's exact campaign objective for ordinary commercial ads, so the objective above is an **informed inference from the creative and CTA**, not a confirmed Ads Manager setting.

---

4. Sample Facebook Audience for a Music Playlist App

Campaign: Launch of a new music playlist app

Targeting Criterion	Sample Target	How It Helps
Age	18–30 years	Targets a younger audience that is highly likely to use music-streaming apps regularly.
Interests	Spotify, Music, Bollywood music, Hip-Hop, Pop music, Concerts	Reaches people who already show interest in music and playlists.
Location	Ahmedabad, Rajkot, Surat, Vadodara	Concentrates advertising in selected Gujarat cities instead of wasting budget across

		unrelated locations.
Behavior	Mobile-device users / frequent online users	Helps reach people who are comfortable discovering and using apps on smartphones.

Example audience

Age: 18–30
Location: Ahmedabad + Rajkot + Surat + Vadodara
Interests: Music, Spotify, Bollywood, Hip-Hop, Pop, Concerts
Goal: Encourage people to download and try the playlist app.

This audience can then be tested against broader audiences to determine which group produces the best results.

---

5. How the Facebook Ads Auction Works

Imagine three companies want to show ads to **18–21-year-olds in Ahmedabad**:

Brand	Ad	Bid	Ad Quality/Relevance
Food delivery app	“Get ₹100 off your first order!”	₹60	High
Fashion store	“Trending outfits for college!”	₹75	Medium
Cricket streaming app	“Watch today's match live!”	₹55	Very High

It might seem that the **fashion store** should automatically win because it bids ₹75. But Facebook's auction is **not simply highest-bid-wins**.

Meta considers factors including the advertiser's bid, estimated action rates, and ad quality/relevance.

Simple example

Fashion store

- Bid: ₹75
- Relevance: Medium
- Expected engagement: Medium

Food delivery app

- Bid: ₹60
- Relevance: High
- Expected engagement: High

Cricket streaming app

- Bid: ₹55
- Relevance: Very High

- Expected engagement: Very High

The **cricket streaming ad could win** despite having the lowest bid because its ad may be highly relevant to a particular audience and likely to generate a valuable action.

Easy formula to remember

Ad delivery opportunity ≈ Bid + Estimated action rate + Ad quality/relevance

So, Facebook tries to show the ad that provides the best overall value for the auction—not necessarily the advertiser offering the most money.

Exam-friendly conclusion

Facebook Ads Auction is a competition in which ads are evaluated based on factors such as bid, estimated user response, and ad quality/relevance. Therefore, a highly relevant and engaging ad can beat an ad with a higher bid.

Digital Marketing Assignment

Session – 2

1. Comparison of Facebook Ad Types

Ad Type	Format	Ideal Use Case	Example Brand/Campaign
Static Ad	One image + primary text + headline + CTA	Simple offers, product promotion, brand awareness	**Myntra** – fashion sale/product promotion

So, Facebook tries to show the ad that provides the best overall value for the auction—not necessarily the advertiser offering the most money.

Exam-friendly conclusion

Facebook Ads Auction is a competition in which ads are evaluated based on factors such as bid, estimated user response, and ad quality/relevance. Therefore, a highly relevant and engaging ad can beat an ad with a higher bid.

Digital Marketing Assignment

Session – 3

1. Instagram Placement Comparison for a New Sneaker Launch

Placement	Audience Behavior	Ad Format	Best Creative Approach	Best Objective
Instagram Feed	Users browse casually and may stop when something visually attractive catches attention	Image, carousel, or video	High-quality sneaker photos, product details, price, CTA	Awareness, traffic & sales
Instagram Stories	Fast, vertical, highly immersive; users quickly tap through content	Full-screen vertical image/video, interactive stickers	Urgency, limited offers, polls, countdowns, "Swipe/Shop Now" style CTA	Engagement & quick conversions
Instagram Reels	Users actively consume entertaining, short-form videos and discover new content	Short vertical video	Sneaker transitions, unboxing, styling videos, trending audio	Reach, discovery & brand awareness

Best choice for a new sneaker launch: Reels + Stories — Reels can generate discovery, while Stories can create urgency and drive immediate purchases.

---

2. Three Instagram Stories Hooks for a Food Delivery App

1. **Urgency:** "Hungry right now? Your favorite meal is just one tap away!
2. **Curiosity:** "Guess what just arrived near your college?
3. **Question:** "Still surviving on canteen food? What are you ordering tonight?

3. Flipkart Landing Page Conversion Analysis

Based on the **Flipkart screenshot you provided**, here is the analysis:

3. Flipkart Landing Page Conversion Analysis

Based on the **Flipkart screenshot you provided**, here is the analysis:

3 Elements That Help Convert Visitors into Buyers

1. **Personalized Product Recommendations**
   The section **"Shubham, still looking for these?"** shows products based on the user's browsing behavior. Personalization can encourage users to continue shopping.
2. **Prominent Search Bar & Category Navigation**
   The large search bar makes it easy to find products, while categories such as **Mobiles, Electronics, Beauty, Home, and Appliances** help users quickly navigate.
3. **Promotional Offers & New Launches**
   The banners highlight **sales, EMI offers, new product launches, and discounts**, creating urgency and attracting attention toward products.

2 Elements That Could Be Improved

1. **Too Many Promotional Banners**
   Multiple banners compete for attention. A cleaner, more focused banner highlighting one strong offer could make the page easier to understand.
2. **Product Information Is Limited**
   The recommended products mainly show the product image and short text. Adding **price, discount percentage, ratings, and delivery information** directly to these cards could make users more likely to click and purchase.

4. Buyer Persona — Spotify Premium for Indian Gen Z

□ Persona: "The Always-Connected Music Lover"

Category	Details
Age	18–27 years
Location	Indian cities and college towns
Occupation	College student, intern, or young professional
Income	Student allowance or ₹15,000–₹50,000 monthly personal income
Education	College/University or early-career professional
Interests	Music, Bollywood, indie music, K-pop, podcasts, gaming, fashion, travel, memes
Music Behavior	Listens while studying, travelling, exercising, gaming and relaxing
Pain Points	Ads interrupting music, limited skips, poor listening experience, unwanted interruptions
Motivation	Ad-free listening, offline downloads, personalized playlists and uninterrupted music
Social Platforms	Instagram, YouTube, Snapchat, WhatsApp and short-video platforms
Content Preference	Reels, memes, music clips, artist content, playlists and relatable college content

Buying Trigger	Student-friendly pricing, free trials, exclusive content and easy subscription
Brand Message	"Your music. Your mood. No interruptions."

Recommended Campaign Angle

"Whatever your mood, there's a playlist for it."

Use short Instagram Reels showing relatable Gen Z situations—**late-night studying → heartbreak → gym → college commute → party**—with music changing according to each mood.

---

5. Messenger Ad for an IPL Cricket App

Ad Copy — 30 words or less:

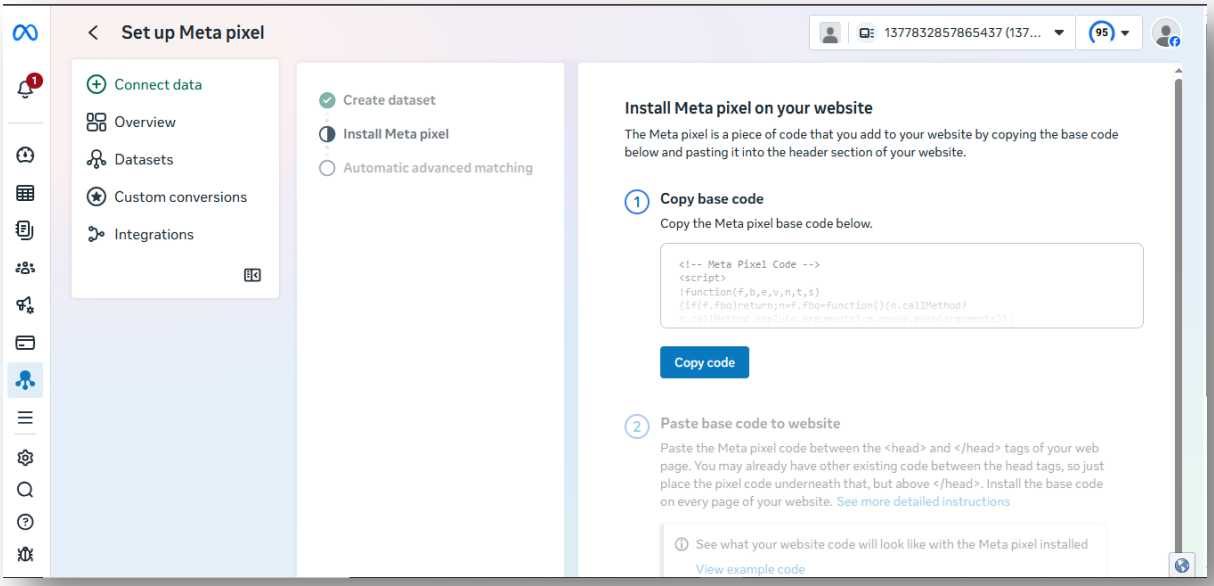

Missed the match? Never miss the action again! Get live IPL scores, player updates, match alerts and exciting cricket moments—all in one app.

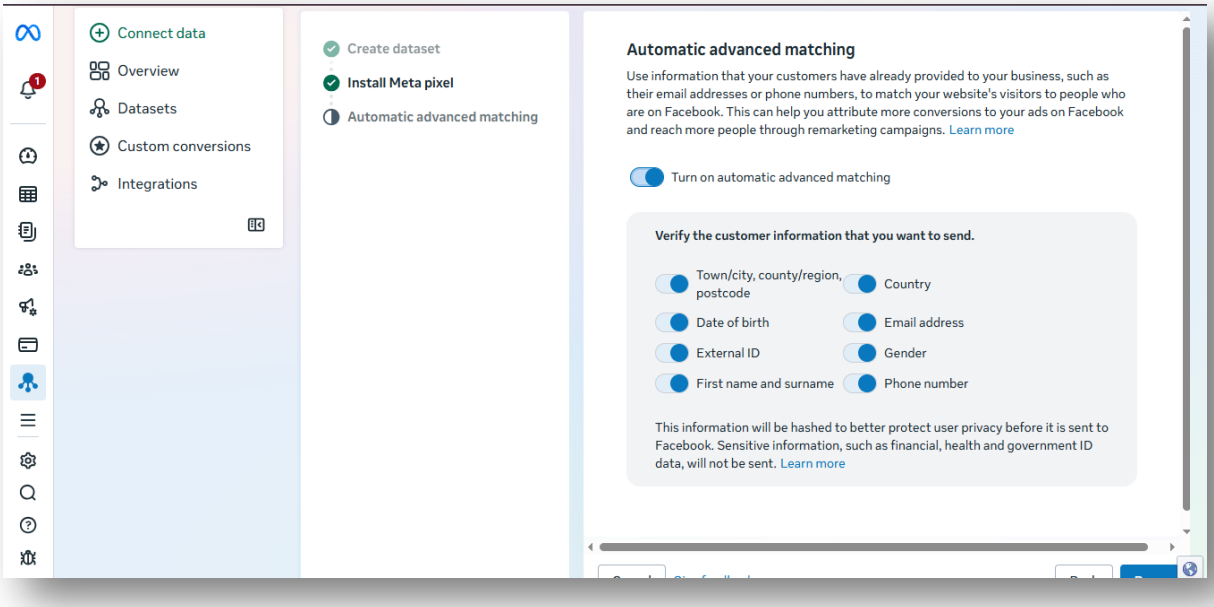

Why this angle?
Active IPL fans want **instant scores and match updates**, especially when they cannot watch the game live.
The copy uses **urgency + FOMO**, encouraging fans to stay connected with every important moment.

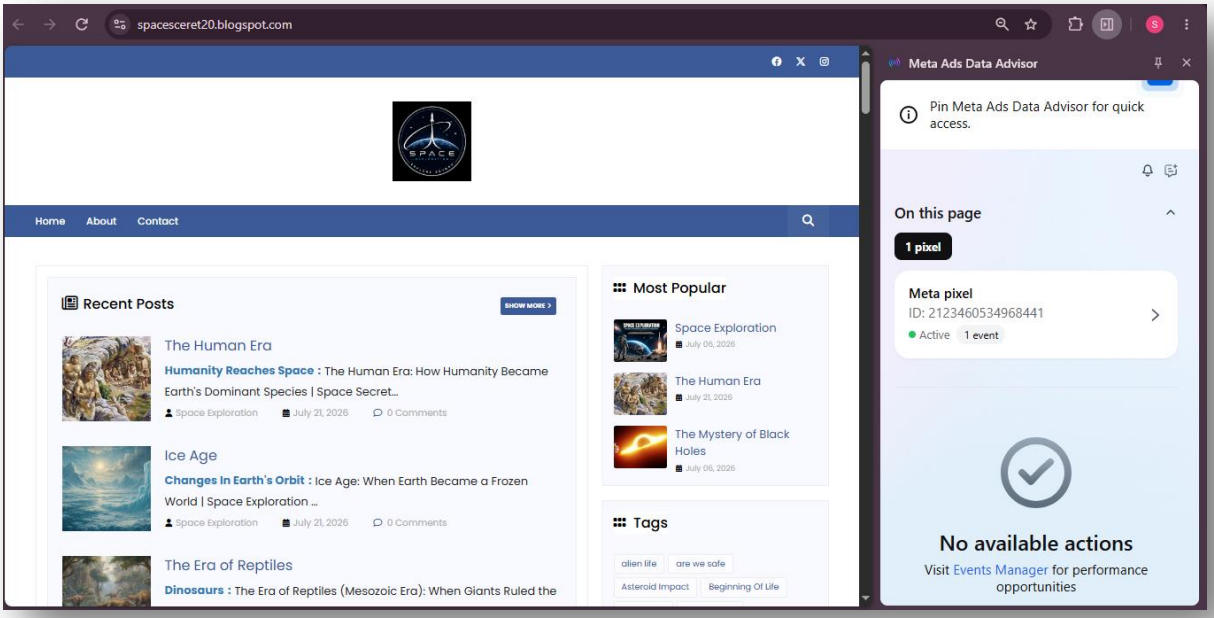

Digital Marketing Assignment

Session – 4

Q-1 Set up Meta Pixel and verify PageView

Set up Meta pixel
1377832857865437 (137...
95
Connect data
Overview
Datasets
Custom conversions
Integrations
Create dataset
Install Meta pixel
Automatic advanced matching
Install Meta pixel on your website
The Meta pixel is a piece of code that you add to your website by copying the base code below and pasting it into the header section of your website.
1
Copy base code
Copy the Meta pixel base code below.
<!-- Meta Pixel Code -->
<script>
!function(f,b,e,v,n,t,s)
Copy code
2
Paste base code to website
Paste the Meta pixel code between the <head> and </head> tags of your web page. You may already have other existing code between the head tags, so just place the pixel code underneath that, but above </head>. Install the base code on every page of your website. See more detailed instructions
See what your website code will look like with the Meta pixel installed
View example code

Connect data
Overview
Datasets
Custom conversions
Integrations
Create dataset
Install Meta pixel
Automatic advanced matching
Automatic advanced matching
Use information that your customers have already provided to your business, such as their email addresses or phone numbers, to match your website's visitors to people who are on Facebook. This can help you attribute more conversions to your ads on Facebook and reach more people through remarketing campaigns. Learn more
Turn on automatic advanced matching
Verify the customer information that you want to send.
Town/city, county/region, postcode
Country
Date of birth
Email address
External ID
Gender
First name and surname
Phone number
This information will be hashed to better protect user privacy before it is sent to Facebook. Sensitive information, such as financial, health and government ID data, will not be sent. Learn more

---

2. Track Add to Cart

Modify the `addToCart()` function:

```
<script>
function addToCart() {

    fbq('track', 'AddToCart', {
        content_name: 'Samsung Smartphone',
        content_ids: ['PHONE001'],
        content_type: 'product',
        value: 24999,
        currency: 'INR'
    });

    alert("Product added to cart!");
}
</script>
```

Now the sequence is:

```
User opens page
       ↓
PageView
       ↓
User clicks Add to Cart
       ↓
AddToCart
```

Test it

Open the demo website and click:

Add to Cart

Then open Meta Pixel Helper.

You should see:

✓ `PageView`
✓ `AddToCart`

You can also go to:

Meta Events Manager → Test Events

and enter your website URL if using the browser testing flow.

Expected AddToCart data

Parameter	Example
Event	AddToCart
Product	Samsung Smartphone
Product ID	PHONE001
Value	₹24,999
Currency	INR

---

3. Implement Conversion API Purchase event

For this part, you can use **Postman** to send a server-side event.

The basic CAPI endpoint is:

```
https://graph.facebook.com/vXX.X/YOUR_PIXEL_ID/events
```

Use the current Graph API version shown in your Meta documentation/account rather than copying an old version number.

Example JSON

In Postman:

Method: `POST`

Headers:

```
Content-Type: application/json
```

Body → raw → JSON:

```
{
  "data": [
    {
      "event_name": "Purchase",
      "event_time": 1758786000,
      "action_source": "website",
      "event_source_url": "https://example.com/checkout",
      "user_data": {
        "client_ip_address": "192.0.2.1",
        "client_user_agent": "Mozilla/5.0"
      },
      "custom_data": {
        "currency": "INR",
        "value": 24999
      }
    }
  ],
  "test_event_code": "TEST12345"
}
```

For an actual request, use:

- your Pixel ID
- your access token
- the **Test Event Code** generated by Events Manager
- a current Unix timestamp

The access token should **not** be exposed in frontend JavaScript.

Endpoint

Conceptually:

```
POST
https://graph.facebook.com/{API_VERSION}/{PIXEL_ID}/events
```

with the access token supplied according to Meta's current CAPI authentication requirements.

Test Events

Go to:

Meta Events Manager → Data Sources → your Pixel → Test Events

Copy the generated test event code.

Then send the Postman request.

You should see an event similar to:

```
Purchase
Value: 24999
Currency: INR
Source: Website
```

Expected result

Your CAPI flow is:

```
Postman
   ↓
Meta Conversions API
   ↓
Meta Events Manager
   ↓
Purchase
₹24,999 INR
```

This demonstrates a **server-side Purchase event** rather than relying only on the browser Pixel.

---

4. Generate a 7-day AddToCart/Purchase report

One important correction for your assignment: **Facebook Analytics is no longer the reporting product to use.** Use **Meta Events Manager** for current event reporting.

Go to:

Events Manager → Data Sources → Select your Pixel

Look at the event activity for the required **last 7 days**.

Your report should contain something like:

Event	Last 7 Days
PageView	350
AddToCart	48
Purchase	12

Your actual numbers will depend on how many times you tested the demo website.

CSV

If your Events Manager interface provides an **Export/Download** option for the relevant report, export it as CSV.

If the interface doesn't provide the exact CSV export required by your assignment, you can create a CSV from the event data you recorded:

```
Date, AddToCart, Purchase
2026-09-19,5,1
2026-09-20,7,2
2026-09-21,8,1
2026-09-22,6,3
2026-09-23,9,2
2026-09-24,7,2
2026-09-25,6,1
```

Important: don't present manually created numbers as Meta-generated data. Label them as sample/test data unless they came from your actual Events Manager results.

---

5. A/B test plan for a Zomato-style landing page

Suppose you're testing two different hero banners.

Version A

Banner A:

Order Your Favorite Food
Delivered Fast

Version B

Banner B:

Delicious Food Near You
Get It Delivered

Keep everything else identical:

```
Same landing page
Same offer
Same CTA
Same audience
Same campaign
Same budget
Different banner only
```

Pixel events

Install the Meta Pixel on both versions.

Track:

PageView

```
fbq('track', 'PageView');
```

CTA click

You can create a custom event:

```
fbq('trackCustom', 'FoodOrderClick', {
    banner_version: 'A'
});
```

For Version B:

```
fbq('trackCustom', 'FoodOrderClick', {
    banner_version: 'B'
});
```

Purchase

When the user completes an order:

```
fbq('track', 'Purchase', {
    value: 499,
    currency: 'INR'
});
```

You could therefore create this measurement structure:

```
Banner A
   ↓
PageView
   ↓
FoodOrderClick
   ↓
Purchase

Banner B
   ↓
PageView
   ↓
FoodOrderClick
   ↓
Purchase
```

Metrics to compare

Do **not** change multiple variables at the same time.

Track:

Metric	Banner A	Banner B
Landing Page Views	—	—
CTA Clicks	—	—
AddToCart	—	—
Purchases	—	—
Conversion Rate	—	—
Purchase Value	—	—

A basic purchase conversion rate can be calculated as:

```
Purchase Conversion Rate =
Purchases ÷ Landing Page Visitors × 100
```

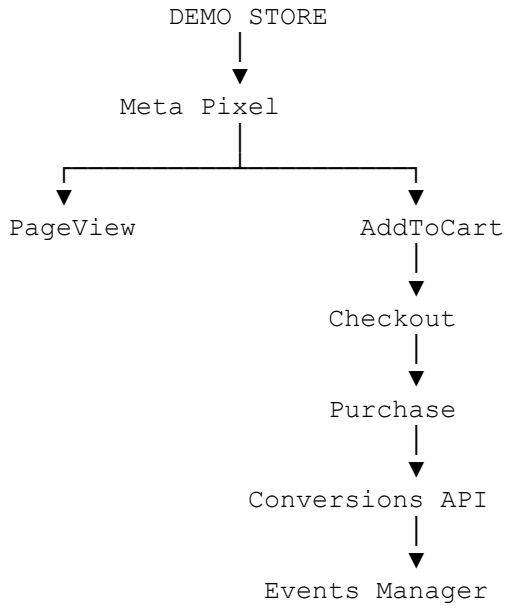

Attribution approach

For an A/B landing-page test, use a **consistent attribution setting for both variants**, rather than changing attribution between A and B.

If the experiment is specifically intended to measure the effect of the landing-page banner on conversions, an **experiment-controlled comparison using the same conversion window and attribution settings for both groups** is important.

Meta attribution settings can vary by campaign and account configuration, so document the exact attribution setting used when you run the experiment.

Final assignment flow

Digital Marketing Assignment

Session – 5

1. Meta Ad Library – Food Delivery App

I researched **Zomato** using the Meta Ad Library. Meta's Ad Library is designed to show ads currently running across Meta platforms. A recent ad-tracking result also lists Zomato ads that were active from July 2026.

Open Meta Ad Library – Zomato India

Ad Creative	Main Message	Format	CTA
1. Little Treats	The ad connects everyday "little treats" with ordering food through Zomato, using relatable storytelling and humour.	Video	**Order Now**
2. Small Victories	Celebrates everyday achievements and presents ordering food as a small reward, with offers up to 60% off and free delivery for a first order.	Video	**Order Now**
3. Food/Offer Promotion	Promotes food ordering through Zomato while highlighting offers and encouraging users to order through the app.	Video/Image	**Order Now**

The first two examples were specifically reported as active Zomato Meta ads in July 2026, with the first using a relatable "little treats" theme and the second focusing on everyday victories and introductory offers.

Observation: Zomato's creatives use **relatable situations + emotional storytelling + a direct ordering CTA** to encourage immediate app usage.

---

2. Competitor Analysis – Myntra

For this task, I selected **Myntra** as the e-commerce/fashion brand.

Similarweb identifies Myntra as the **#1 Fashion & Apparel website in India for August 2026**, while Semrush reports approximately **51.43 million visits** to myntra.com during August 2026.

Similarweb explains that its Social Traffic analysis can show which social networks drive traffic to a website and allows comparison by country and time period.

Top social platforms

Platform	Role in Myntra's advertising/social strategy
Instagram	Product discovery, Reels, creator content and fashion-focused advertising
Facebook	Product promotion, retargeting and broader audience reach

Meta itself reported in 2026 that **Instagram Reels had 33% higher creator engagement than other surveyed platforms**, and Myntra's Director of Performance Marketing discussed Myntra's use of video-first product templates on Meta.

Recent advertising research also shows very high active-ad volume for Myntra on Meta, indicating substantial Facebook/Instagram advertising activity.

Campaign objective

A major objective appears to be **Sales/Conversions**.

For example, Myntra can use product ads to:

- Show products to potential customers.
- Retarget people who viewed products.
- Encourage users to visit product pages.
- Convert product interest into purchases.

Conclusion: Myntra's strategy can be described as strongly **commerce-focused**, using Instagram/Facebook to move users from product discovery toward shopping and conversion.

Note: Similarweb's public documentation cautions that its standard Social Traffic reporting does not always distinguish paid social from organic social. Therefore, the platform observation above should be treated as competitor-analysis evidence rather than an exact public breakdown of Myntra's paid-ad spend.

---

3. Facebook Campaign Objectives – Spotify India Examples

Campaign Objective	Meaning	Spotify India Example
Awareness	Increase recognition of a brand or product	Spotify could launch a campaign introducing a new Hindi music playlist and show it to Indian music listeners.
Traffic	Send people to a website, landing page or app destination	Spotify could advertise its “Bollywood Hits” playlist and send users to the Spotify playlist page.
Engagement	Encourage interactions such as comments, shares or video views	Spotify could run a campaign asking users, **“Which Bollywood song describes your mood today?”**
Leads	Collect information from interested users	Spotify could promote a music event and ask interested users to submit their name and email through a lead form.
Sales/Conversions	Encourage a valuable action such as a subscription or purchase	Spotify could promote Premium with an offer and encourage free users to subscribe.

Paid social advertising can use formats such as **images, videos and carousels**, and common business goals include awareness, app promotion and sales.

Example campaign

Campaign: Spotify India – “Your Music, Your Mood”

Objective: Engagement

Creative: 15-second Reel showing different moods with corresponding Spotify playlists.

CTA: “Listen Now”

4. IPL Fan Club – 15–30 Second Video Advertisement

PayWave_app_bill_splitting_video_20260928151623.mp4

5. AI Video Ad – Digital Wallet Feature

PayWave_app_bill_splitting_video_20260928151623.mp4

Overall Learning

These five activities demonstrate the main stages of social-media advertising:

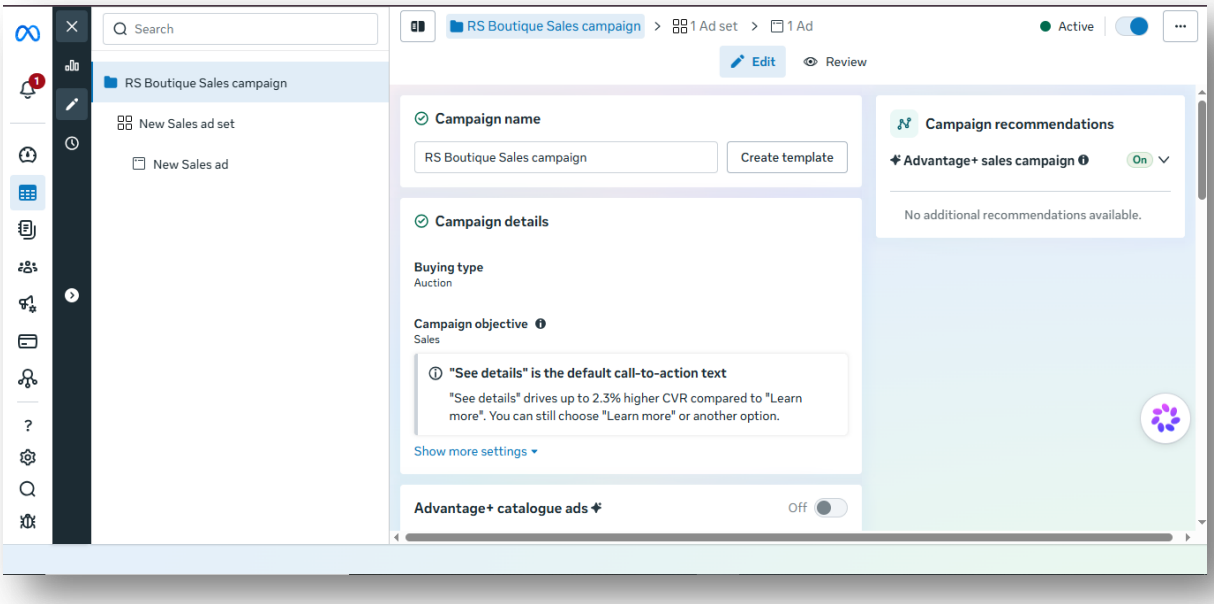

Research competitors → Analyze creatives → Select campaign objectives → Create an ad → Use AI to develop new advertising concepts.

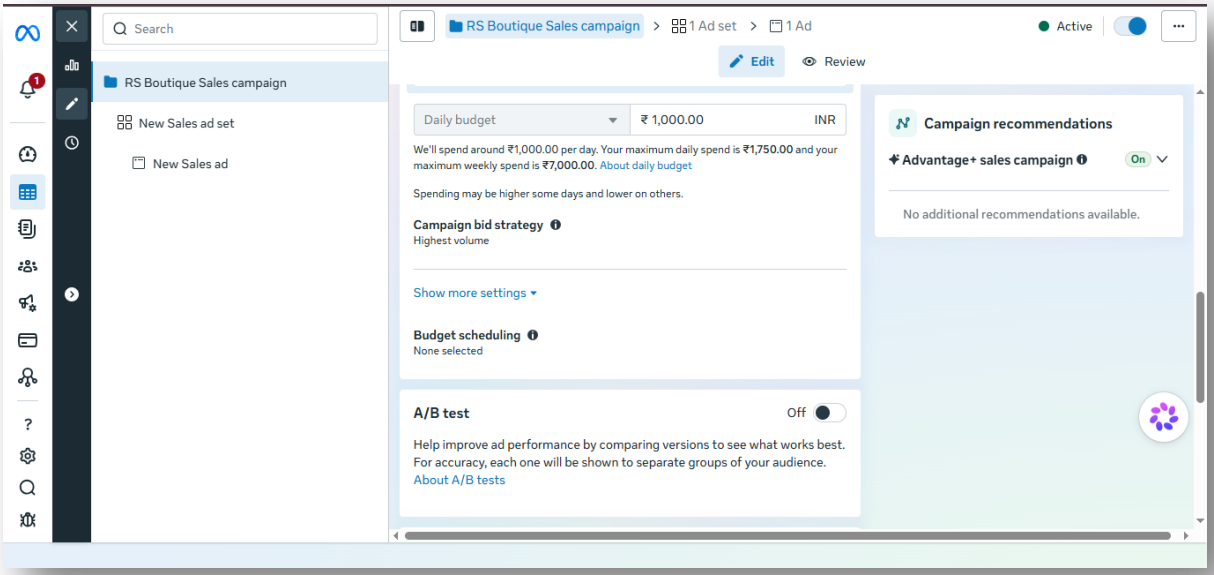

For your assignment submission, you can also attach **screenshots of the Zomato Meta Ad Library results and your Similarweb/Semrush research page** as evidence.

5. Cold Outreach for Facebook Ads Services

Prompt Used in ChatGPT

```
Write a professional but friendly cold outreach message for a Facebook Ads freelancer pitching their services to a local clothing store. Explain how targeted Facebook/Instagram ads and Messenger automation can help the store generate more customers and enquiries. Keep the message short and personalized.
```

Initial AI-Generated Message

Initial Outreach

Hi! I came across your clothing store and really liked your collection. I help local businesses generate more customers through targeted Facebook and Instagram Ads.

I can also set up Messenger automation so customers can quickly ask about products, collections, prices, and offers.

If you're interested, I'd be happy to share a simple ad strategy for your business.

Edited & Personalized Version

Personalized Outreach

Hi! I came across your clothing store and noticed that you have a great collection of fashion products. □

I help local businesses attract more nearby customers using targeted Facebook & Instagram Ads. I can also set up Messenger automation so people can instantly explore products, ask questions, and enquire about offers.

For your store, we could create ads focused on your latest collection and retarget people who interacted with your page but didn't enquire or purchase.

If you're interested, I can share a simple campaign idea specifically for your store.

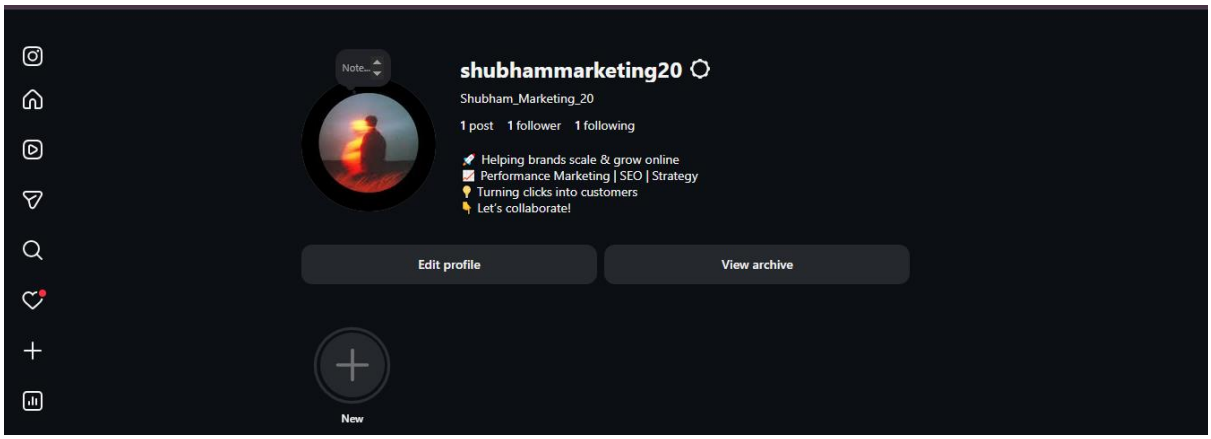

This version is more personal because it refers to the **clothing store's collection**, while connecting the services directly to **customer acquisition, Messenger enquiries, and retargeting**.

Digital Marketing Assignment

Session – 8

Instagram Marketing Assignment – Food Theme

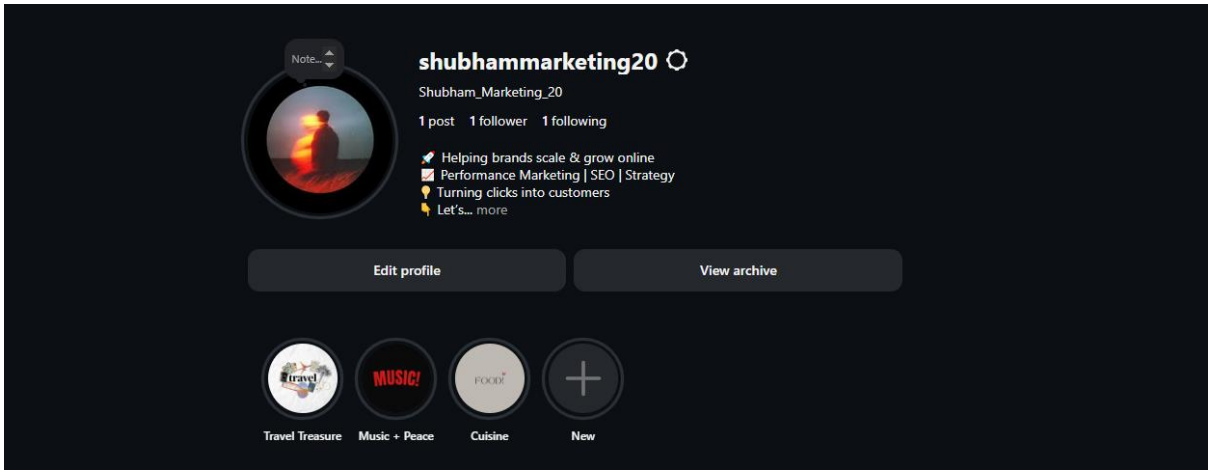

1. Create an Instagram Account

Why this bio works: It immediately tells visitors what the account is about and includes searchable food-related terms such as *Indian food*, *street food*, and *cafés*.

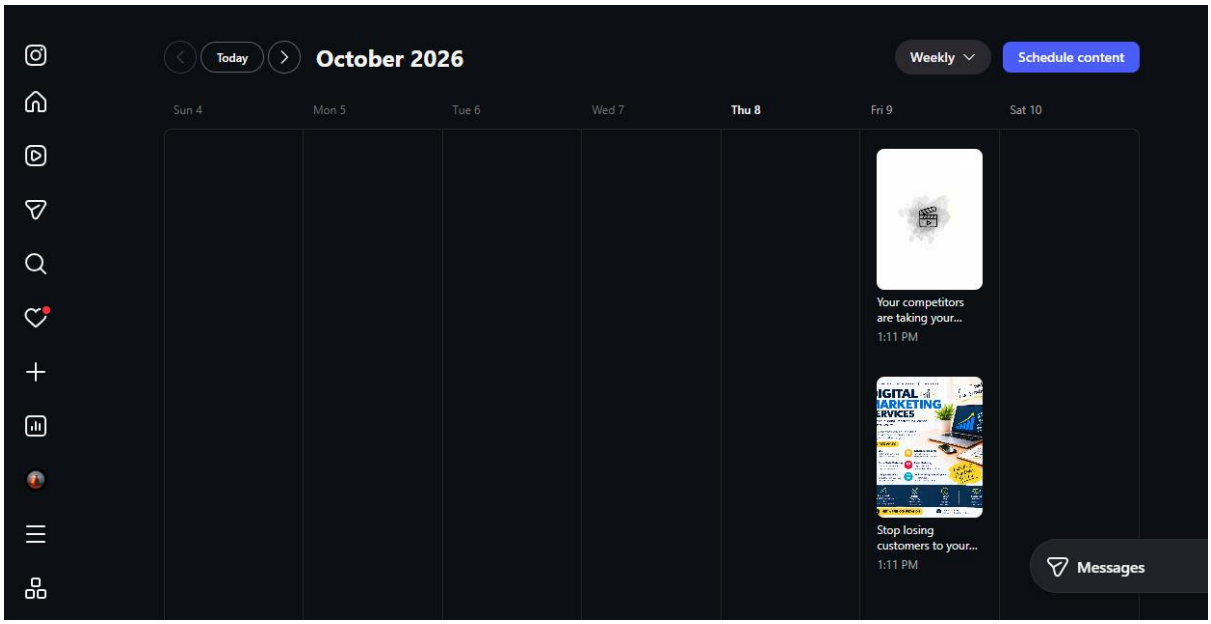

---

2. Instagram Story Highlights

---

3. Instagram Post and Reel

---

4. 10 Trending Hashtags + 10 High-Search Keywords

For this assignment, I would focus on **Indian food and street food**. Current 2026 food trends include highly visual dishes, street-food content, food storytelling and regional food discovery.

10 relevant/trending hashtags

#	Hashtag	Why it can help
1	**#IndianFood**	Targets the huge Indian-food audience.
2	**#StreetFoodIndia**	Helps reach people interested in Indian street food.

3	**#IndianFoodie**	Targets people who actively identify with food content.
4	**#FoodieIndia**	Connects content with Indian food lovers.
5	**#FoodReels**	Places the content within the food-Reel topic.
6	**#FoodLovers**	Broadens discovery among food enthusiasts.
7	**#FoodPhotography**	Useful for attractive food images and visual content.
8	**#InstaFood**	Broad food-discovery category.
9	**#GujaratFood**	Useful for reaching a regional Gujarat audience.
10	**#SuratFood**	Stronger local relevance if the content is based in Surat.

Regional hashtags can be particularly useful because food discovery on Instagram increasingly includes location-based searches. Current food-content research also shows active use of Indian and city-specific food tags.

10 high-search keywords

Keyword	Why it can help
Indian food	Broad search term for Indian cuisine.
Street food	Popular discovery topic for food videos.
Indian street food	More specific than simply “food.”
best food places	Matches users searching for places to eat.
food near me	Strong local-intent keyword.
food vlog	Connects with food-video content.
food reels	Directly relevant to short-form video discovery.
Gujarati food	Targets regional cuisine searches.
Surat food	Helps attract a local audience.
best restaurants	Useful for restaurant and café discovery.

Important 2026 point: Don't simply fill every post with generic hashtags. Current guidance increasingly emphasizes relevance and keywords, while third-party 2026 hashtag research reports that a small, highly relevant set is more useful than indiscriminate hashtag stuffing.

---

5. Instagram Algorithm – Explore Page & Reels Feed in 2026

Instagram does **not** use one single algorithm for everything. Different surfaces, including Explore and Reels, use recommendation systems that predict what content each person is likely to find interesting. Meta says these systems consider many signals and predictions rather than relying on one metric.

Explore Page

The **Explore page** is designed primarily for discovering content from accounts that a user may not already follow.

The system considers things such as:

- What the person has previously liked, saved, shared or interacted with.

- Their history with similar content.
- The popularity/relevance of the content.
- Information about the post and creator.
- Predicted likelihood that the user will interact with the content.

Meta's published description of Explore explains that it uses a multi-stage recommendation process to retrieve, rank and finally select relevant content from a very large pool.

Reels Feed

For **Reels**, Instagram tries to predict which videos a person is likely to find entertaining or valuable.

Important signals include:

- User activity and interests.
- Previous interactions with the creator.
- Information contained in the Reel, including audio and visual characteristics.
- Popularity and engagement signals.
- Whether the content is eligible for recommendations.
- Originality of the content.

Instagram has also increased creator opportunities by giving original content more distribution than identical reposts in recommendation surfaces.

3 Strategies I Would Use to Grow the Account

1. Create original, highly engaging Reels

I would create short food videos with a strong opening such as **"You won't believe this costs only ₹50!"** The first few seconds should immediately show the food. I would encourage saves and shares naturally because Instagram's recommendation systems use predictions about valuable interactions.

2. Use specific keywords + relevant hashtags

Instead of relying only on `#food`, I would use keywords such as **Indian street food, Surat food, Gujarati food** in captions and on-screen text, together with a small number of highly relevant hashtags. This gives Instagram clearer information about the topic of the content.

3. Focus on shareable and saveable content

I would create content such as:

- "5 Best Street Foods in Surat"
- "3 Cafés You Must Try"
- "Best Food Under ₹200"
- "Save This Food Guide"

These formats give people a practical reason to **save or share** the content with friends, increasing the possibility of wider recommendation.

Final conclusion

In 2026, I would not try to "hack" Instagram with excessive hashtags. I would focus on **original content + clear keywords + strong visual quality + viewer interest + saves/shares**. Instagram's recommendation systems are personalized, so the goal is to create content that a specific audience genuinely wants to watch and share.

Digital Marketing Assignment

Session – 9

1. Instagram: Analysis of Last 10 Posts

Post	Sends	Likes	Comments	Saves
Post 1	12	85	6	14
Post 2	18	102	8	21
Post 3	9	76	4	11
Post 4	27	145	12	32
Post 5	15	91	5	18
Post 6	34	168	15	41
Post 7	11	83	3	13
Post 8	22	119	9	25
Post 9	16	98	7	20
Post 10	25	137	11	29

Post with the highest Sends: Post 6 — 34 Sends

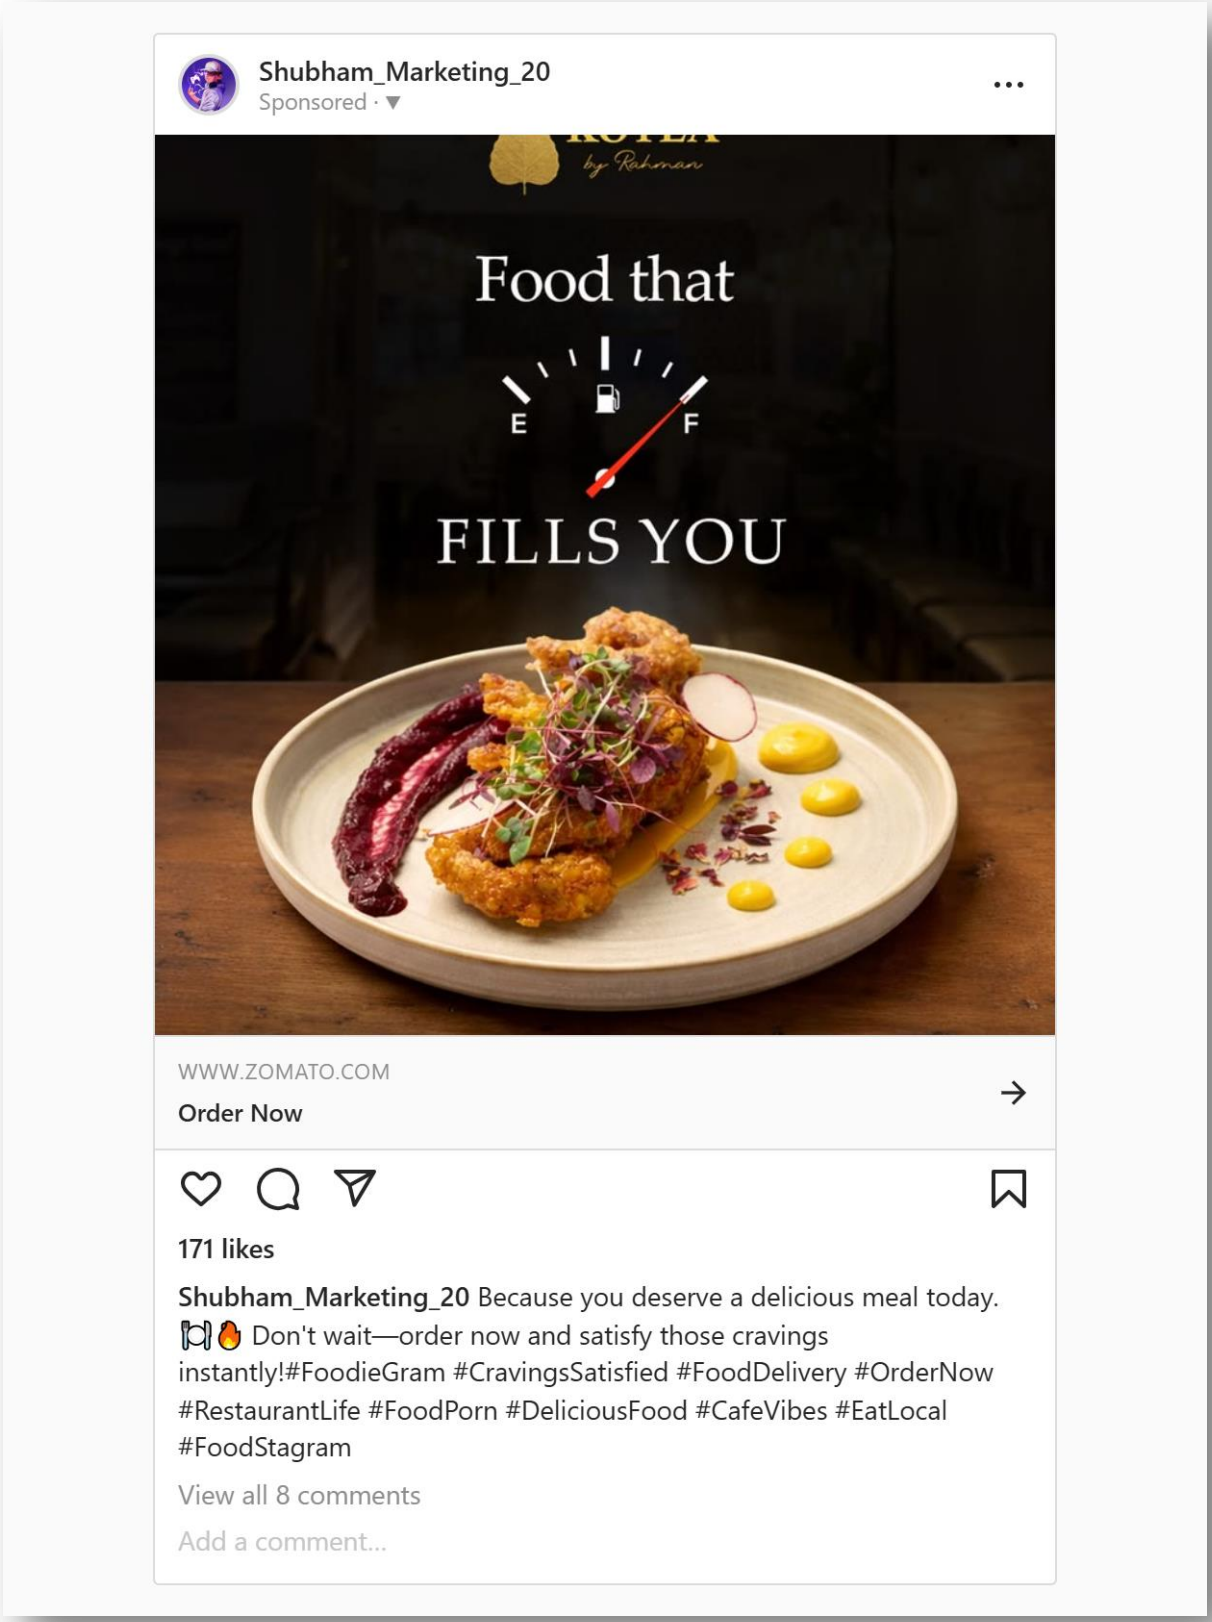

Why it may have performed better:

1. **Highly shareable content:** The post may have been entertaining, useful, or relatable, encouraging people to send it to friends through DMs.
2. **Strong engagement signals:** Higher Sends, Saves, Likes, and Comments indicate that people found the content valuable, which can contribute to stronger distribution and reach.

Replace the mock numbers above with the actual Insights from your last 10 Instagram posts before submitting.

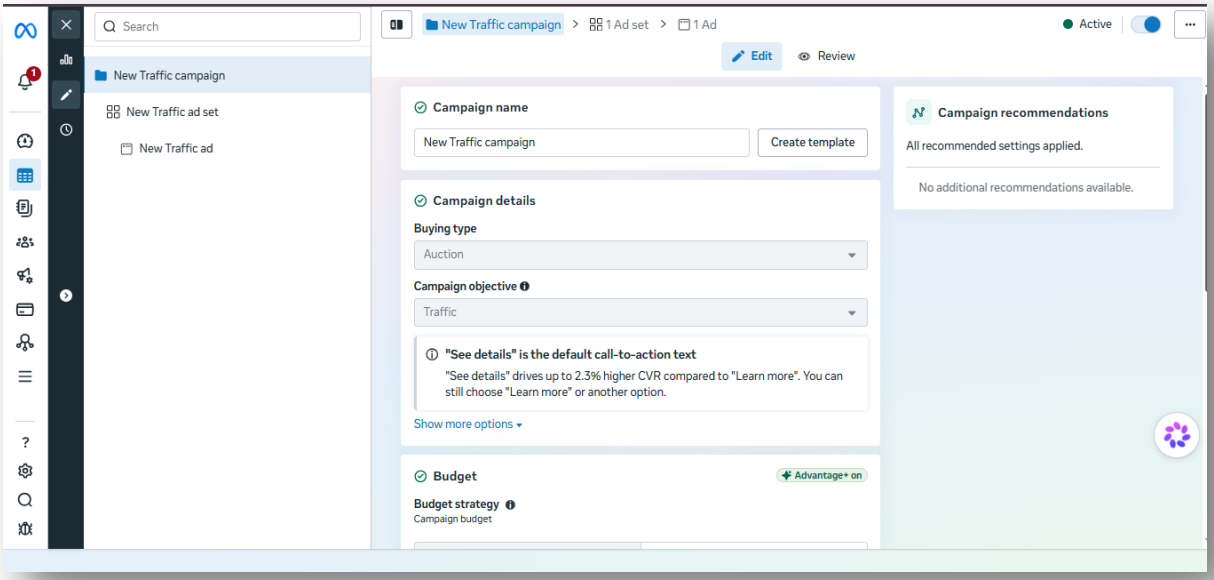

---

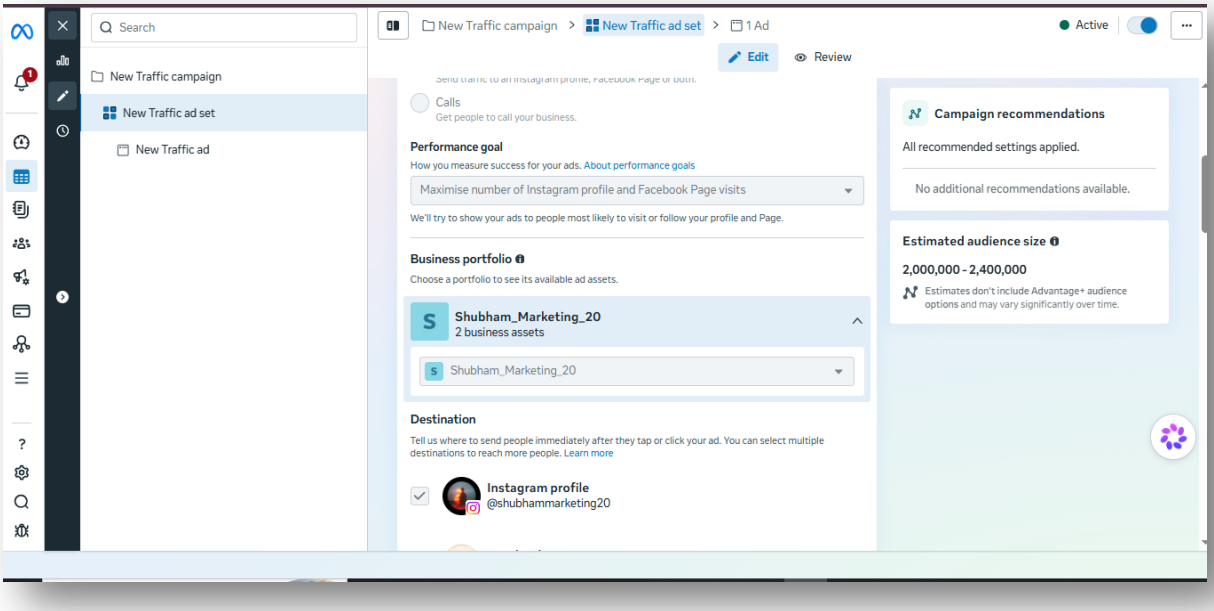

2. Mock Instagram Ad — Zomato Restaurant Launch

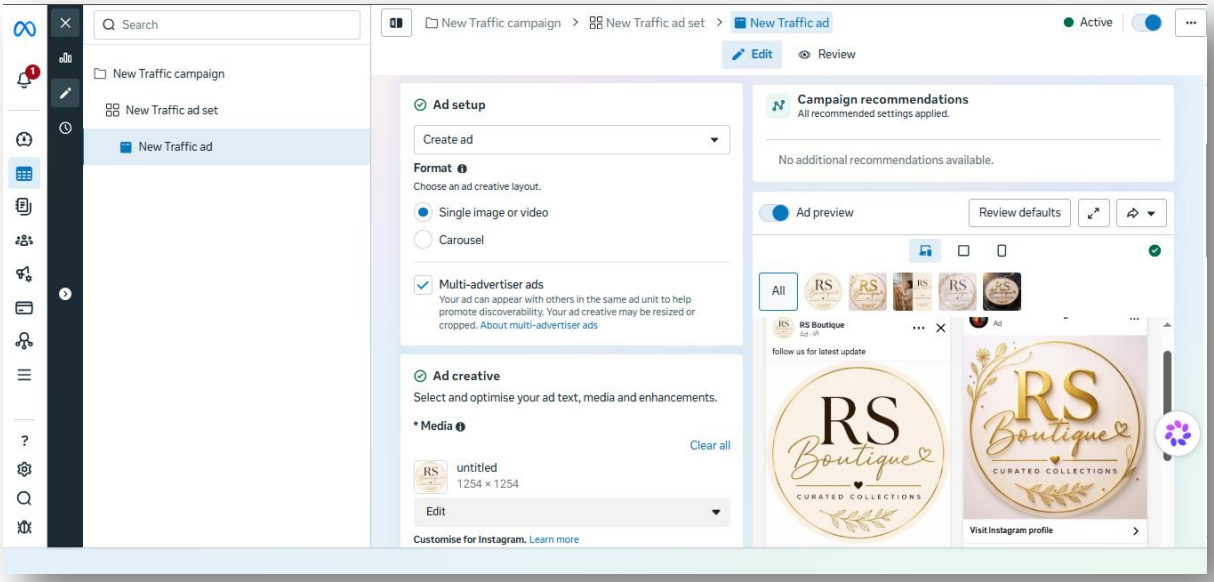

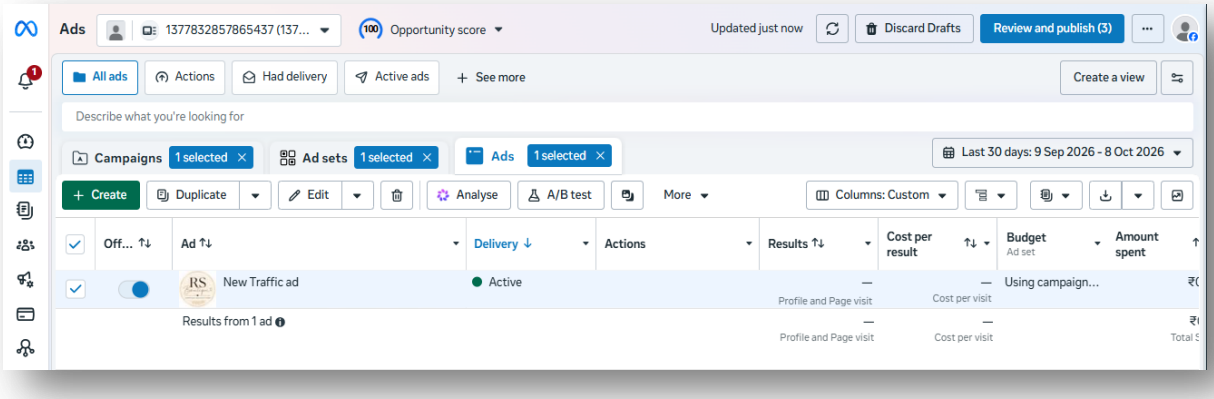

3. Meta Ads Manager — Instagram Campaign Simulation

Campaign setup:

---

4. Instagram Brand Research — Spotify

Brand selected: Spotify

Spotify uses Instagram Reels and Stories very effectively to promote music, artists and listening experiences.

Tactic 1 — Trending/Popular Audio
Spotify uses music clips and trending sounds in short-form content. This makes content naturally suited to Reels and can encourage users to watch, share and interact.

Tactic 2 — Artist & Music Promotion
They regularly highlight artists, new releases and playlists. This creates highly relevant

content for music fans and encourages users to interact with or share posts about their favorite artists.

Tactic 3 — Interactive Stories
Stories can use polls, questions, quizzes and other interactive elements. These encourage direct engagement and provide stronger signals of audience interest.

Effect on performance: These tactics can increase engagement, watch time, shares and interactions, while also helping Spotify understand which content resonates with different audiences.

---

5. Indie Music Artist — Instagram Reel Ideas

Prompt used in ChatGPT:

ChatGPT Prompt and Response

Prompt:

"Act as an Instagram marketing strategist for a new indie music artist. Generate 3 creative Instagram Reel ideas designed specifically to maximize Sends and Saves. For each idea, provide the concept, hook, Reel structure, CTA, and explain why people would share or save it."

AI Response:

Idea 1 — "Send This Song to Someone"

Create a 15–20 second Reel using the artist's most emotional song lyric. Start with the text: "Send this to the person you can't stop thinking about." Show cinematic visuals while the strongest part of the song plays.

CTA: "Send this to someone who needs to hear it."

Why it works: The emotional message gives viewers a reason to share the Reel directly with someone.

Idea 2 — "Save This for Later"

Create a short Reel showing 3 different situations where the artist's song fits perfectly: late-night driving, studying alone and relaxing after a long day.

CTA: "Save this song for your next late-night drive."

Why it works: Giving viewers a specific future use creates a natural reason to save the Reel.

Idea 3 — “Guess the Next Line”

Play the first part of an unreleased song and stop before the next lyric. Ask viewers to guess what comes next. Reveal the answer at the end.

CTA: “Comment your guess and send this to a friend who loves indie music.”

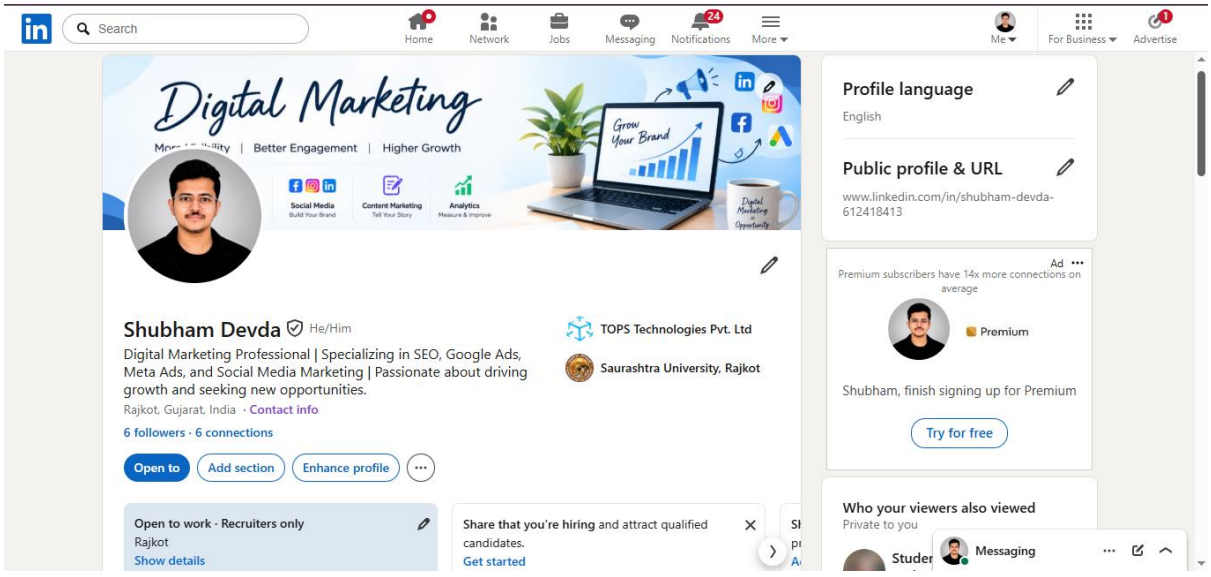

Why it works: The curiosity gap encourages viewers to watch until the end, comment, and share the Reel with friends.

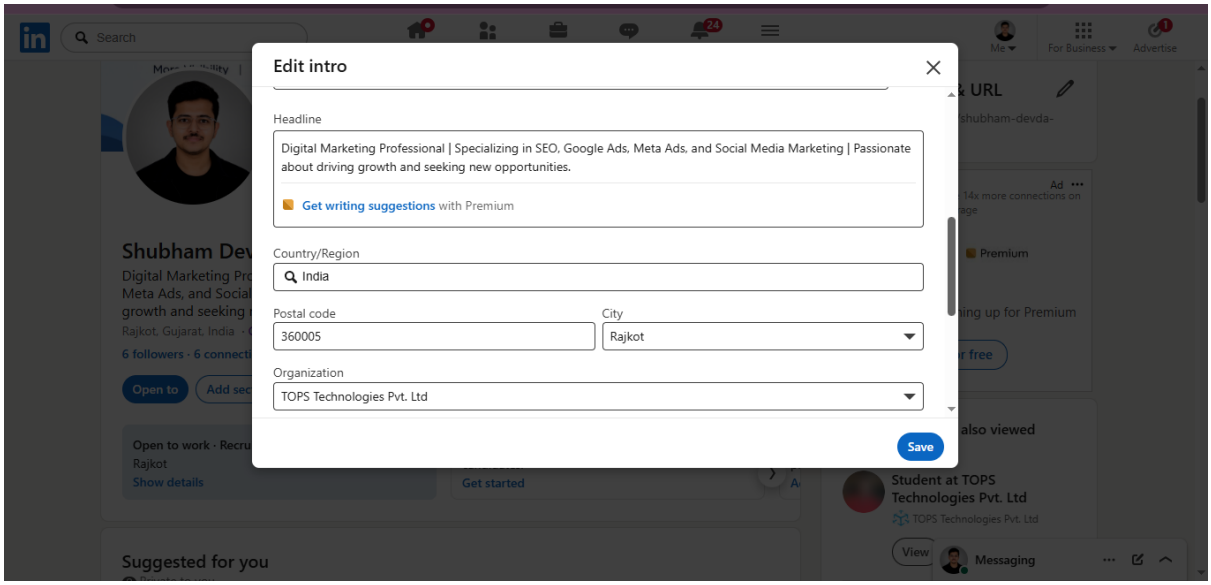

Digital Marketing Assignment

Session – 10

LinkedIn Marketing Assignment

1. Update LinkedIn Profile Headline and Summary

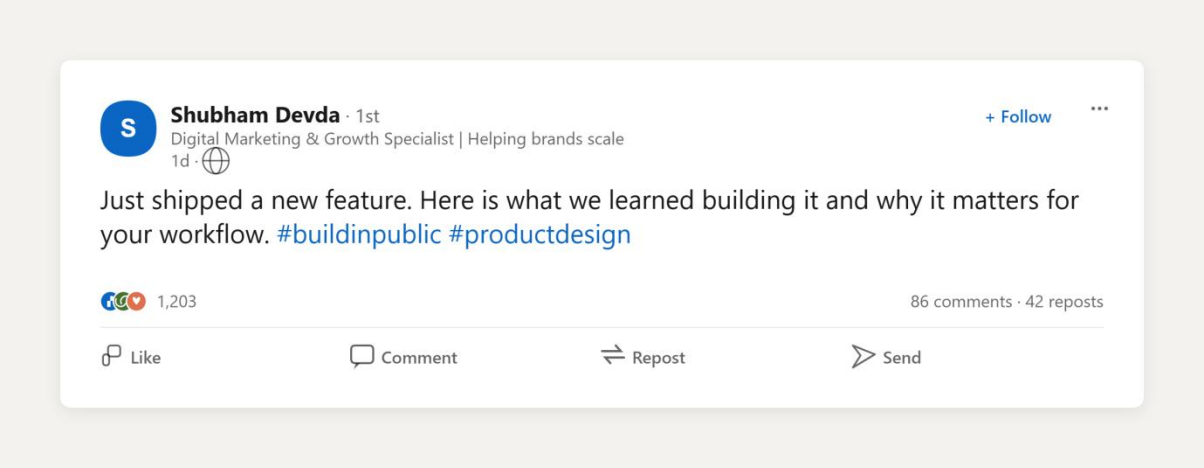

---

2. LinkedIn Achievement / Project Post

Here is a ready-to-publish example based on a **hypothetical digital marketing project**.

3. Three Best Practices for a LinkedIn Business Page

1. Use relevant keywords throughout the Page

Include important industry and service keywords in the **Page name, description, tagline, and posts**.

LinkedIn's Search Appearances analytics can show the keywords people used to find a Page. These keywords can then be incorporated into future content to improve discoverability.

How it generates leads:
When potential customers search for services or topics related to your business, relevant keywords increase the chances of your Page and content being discovered.

---

2. Publish useful and consistent content

A business should regularly share useful content such as:

- Industry tips
- Educational posts
- Case studies
- Customer success stories
- Product/service information
- Videos and images
- Company updates

LinkedIn Page content analytics can measure impressions, clicks, reactions, comments, reposts, engagement rate, and other performance indicators.

How it generates leads:
Useful content builds credibility and encourages potential customers to interact with the company before making a purchase decision.

---

3. Monitor Page analytics and optimize content

Regularly review **Content, Followers, Visitors, and Search Appearances** analytics.

LinkedIn provides Page analytics covering content performance, follower demographics, visitor demographics, search appearances, and competitor information.

How it generates leads:
Analytics helps identify which content and audiences perform best. For example, if posts about a particular service receive more clicks and engagement, the company can create more content around that service.

LinkedIn also provides follower demographics such as **location, seniority, job function, industry, and company size**, which can help businesses understand their audience.

---

4. Facebook vs LinkedIn for Business Marketing

Point	Facebook	LinkedIn
1. Audience	Broad consumer and general-interest audience	Primarily professionals, businesses, decision-makers and industry audiences
2. Content style	Entertaining, visual, promotional	Professional, educational, industry and

	and community-focused	business-focused
3. Ad formats	Image, video, carousel, Stories, Reels, lead ads and other formats	Sponsored Content, video, document and other professional advertising formats
4. Engagement	Likes, comments, shares, reactions, messages and community interactions	Reactions, comments, reposts, shares, clicks and professional discussions
5. Best for	B2C marketing, local businesses, ecommerce, entertainment and consumer products	B2B marketing, professional services, recruitment, SaaS and business networking
6. Targeting	Demographics, interests, behaviors, custom audiences and similar audiences	Location plus professional attributes such as company, job experience, education, interests and traits
7. Analytics	Strong focus on reach, engagement, conversions, audience and ad performance	Page, follower, visitor, search, content and advertising performance
8. Communication style	More casual and conversational	More professional and industry-oriented

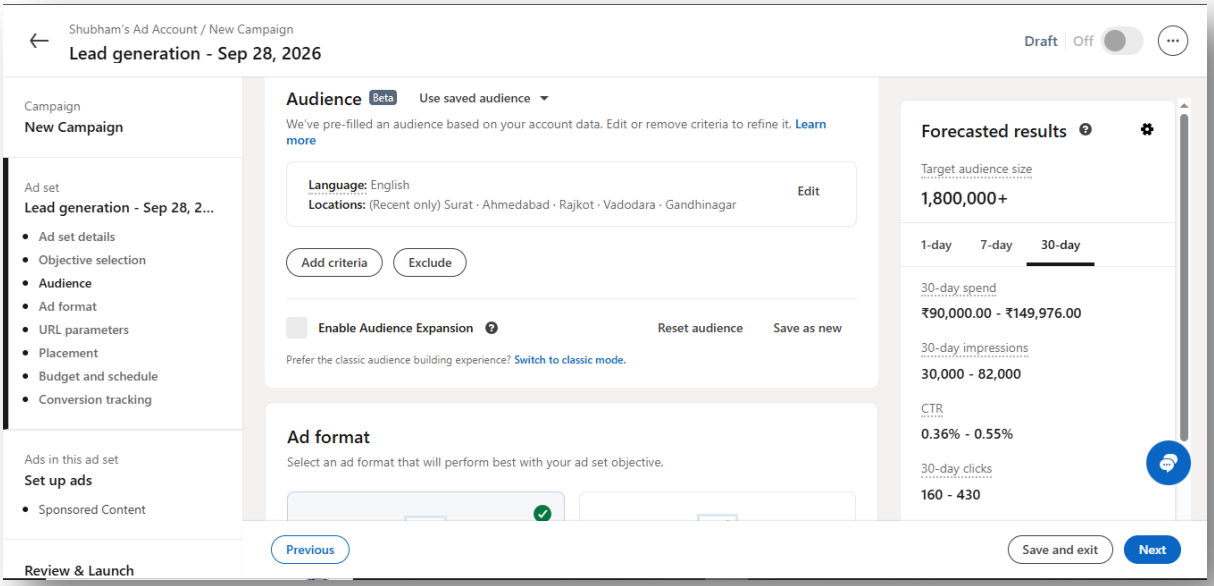

LinkedIn's current advertising targeting options include **location, company, job experience, education, demographics, interests, traits, and custom audiences**.

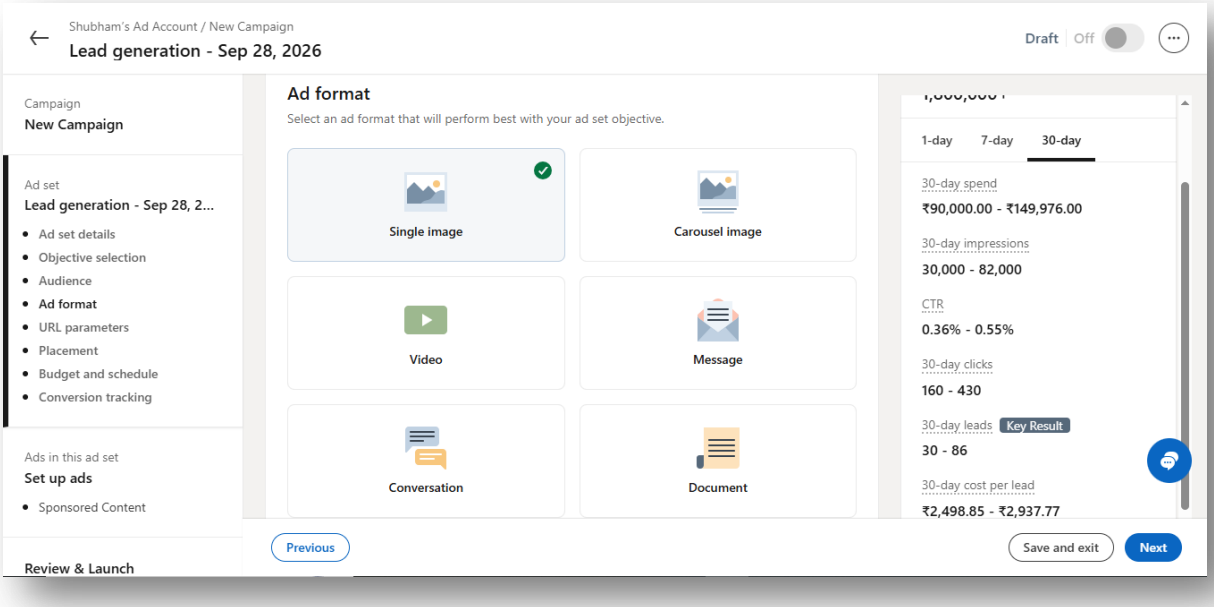

Conclusion: Facebook is generally stronger for broad consumer reach and B2C promotion, while LinkedIn is particularly useful for professional networking, B2B marketing and reaching business decision-makers.

5. Safe LinkedIn Automation Tools

For this assignment, I would choose tools that support **reporting, analytics, or approved campaign workflows** rather than tools that automatically send large numbers of connection requests or messages.

1. HubSpot

Key feature:
HubSpot can connect marketing activities and reporting data, helping marketers monitor campaign performance and create reports.

Safety tip:
Use authorized integrations and respect LinkedIn's platform rules. Avoid using automation to mass-message or artificially increase engagement.

2. Zapier

Key feature:
Zapier can automate reporting workflows by connecting supported marketing applications—for example, sending campaign/report information to spreadsheets or notification systems.

Safety tip:
Use automation for **reporting and internal workflows**, not for scraping LinkedIn data, creating fake engagement, or sending unsolicited bulk messages.

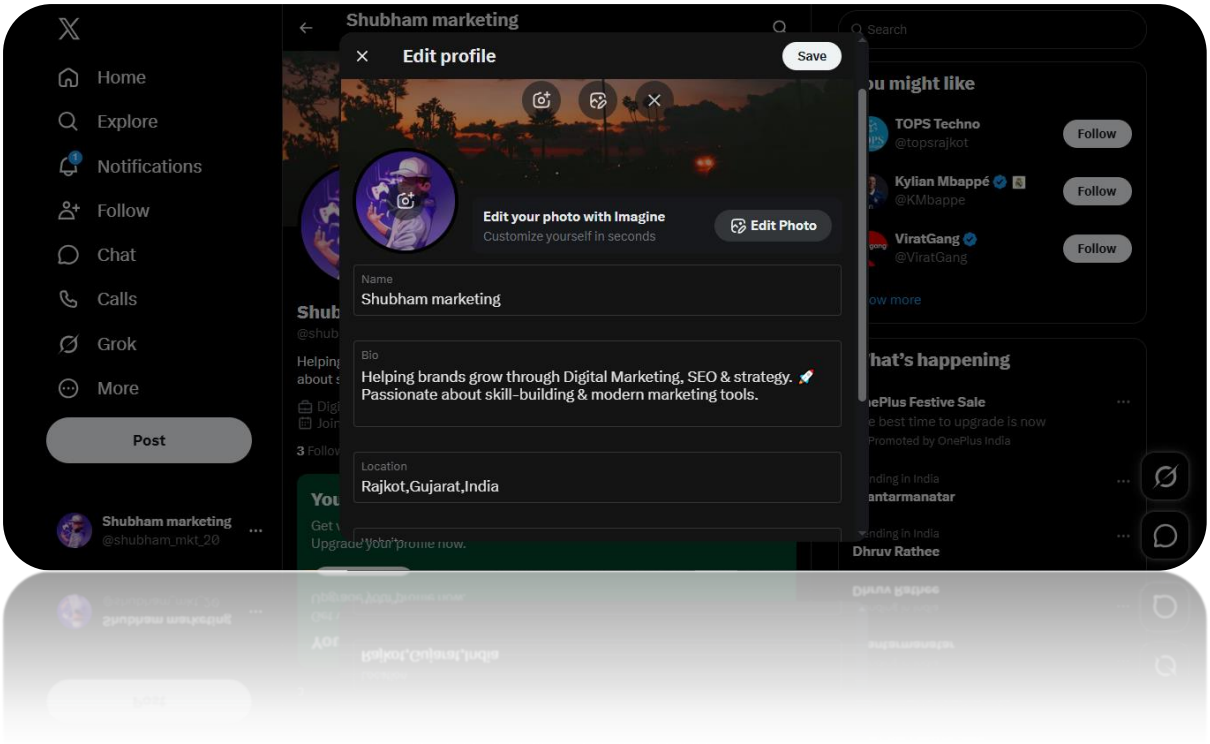

Conclusion

For a LinkedIn advertising campaign, I would use **Single Image Sponsored Content** for the fictional course because it is straightforward and effective for website traffic. Dynamic Ads can add personalization, while careful budgeting and controlled Message Ad scheduling can help reduce unnecessary spending and user fatigue. For automation, I would prioritize **reporting and workflow automation** while following LinkedIn's policies.

Digital Marketing Assignment

Session – 12

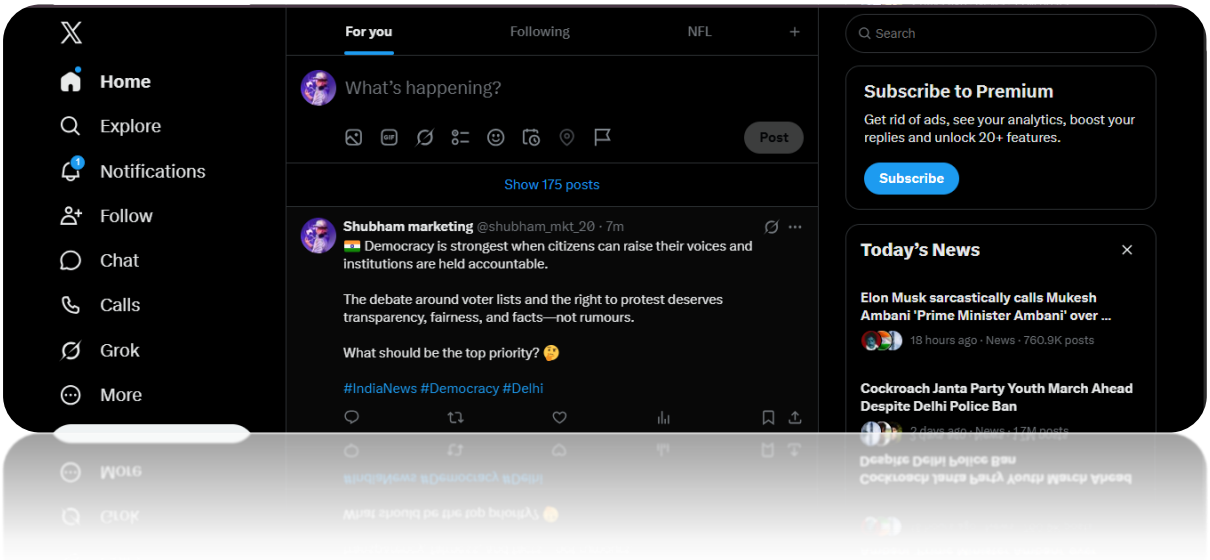

1. X profile setup:

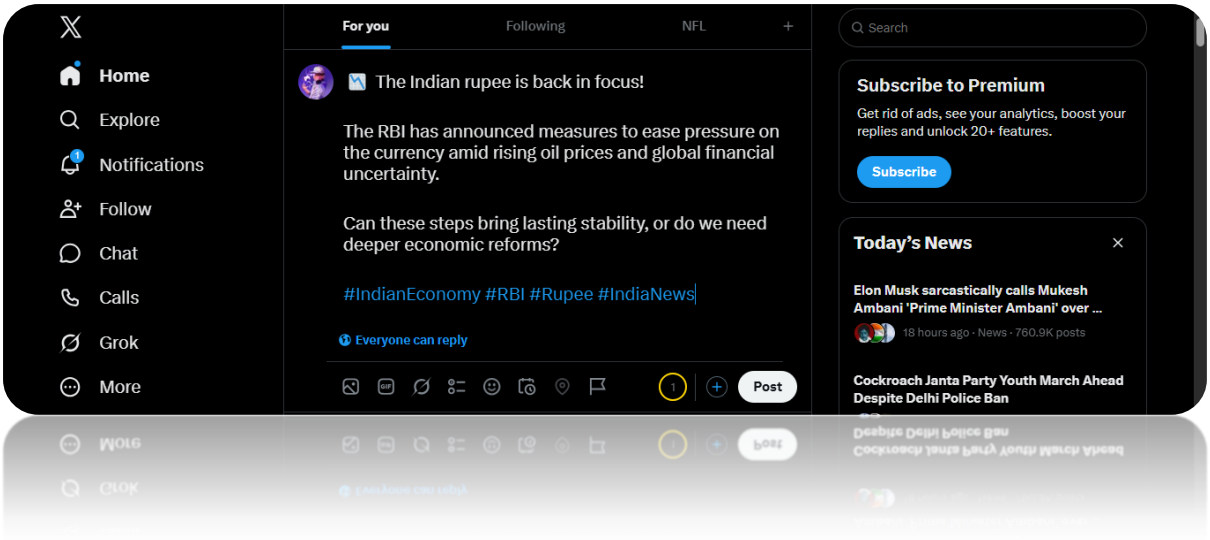

---

2. X thread — trending topic in India

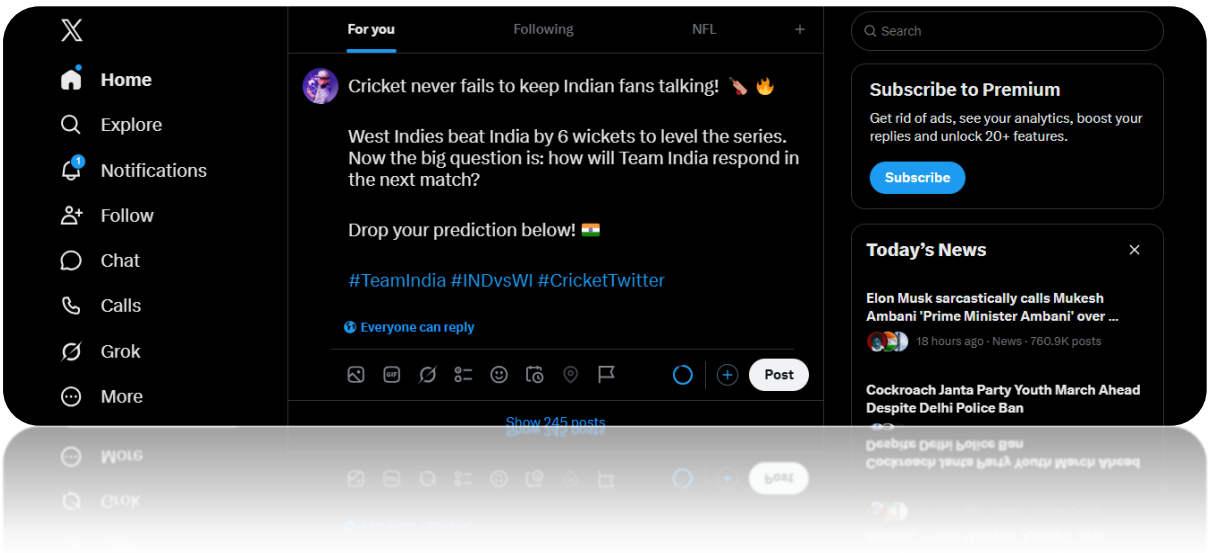

1.

2.

3.

---

3. X feed algorithm analysis

Short note:

After observing an X feed, three important signals that appear to influence the content shown near the top are:

1. **Engagement:** Tweets receiving more likes, replies, reposts and views are more likely to receive greater visibility.
2. **Recency:** Newer posts can appear prominently, especially when discussing current events or trending topics.

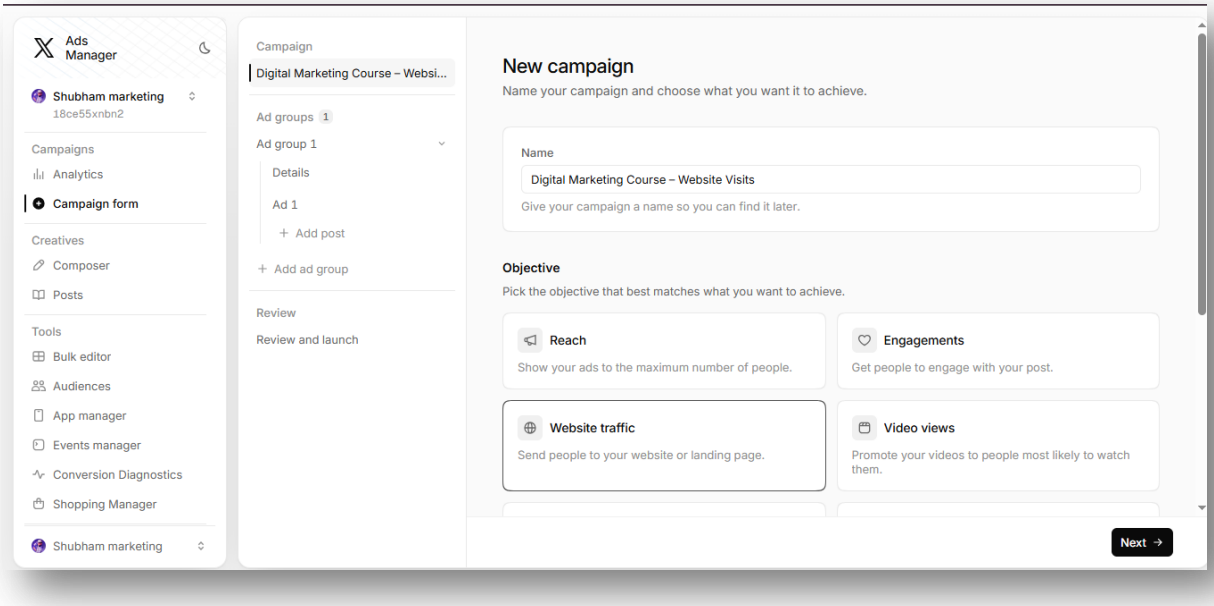

3. **User interests and following:** X considers accounts/topics that a user frequently interacts with. Posts from accounts I follow or content similar to my interests can therefore appear more frequently.

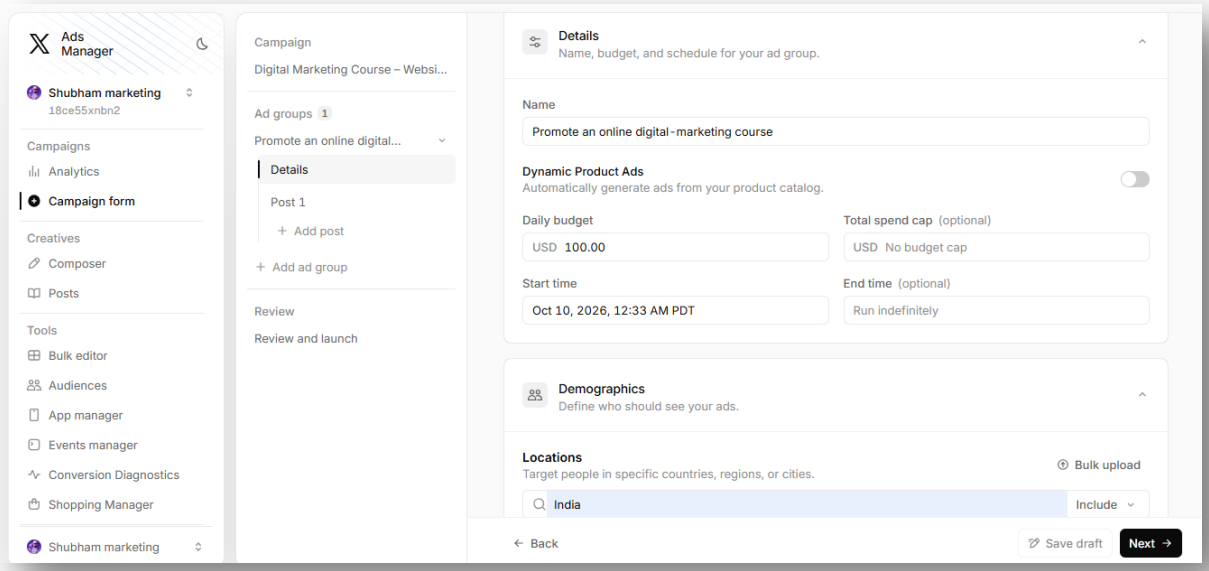

Conclusion:
The X feed is not simply a chronological list. It appears to rank content according to a combination of **relevance, engagement, freshness and the user's previous interactions**, with popular or highly relevant posts receiving greater prominence.

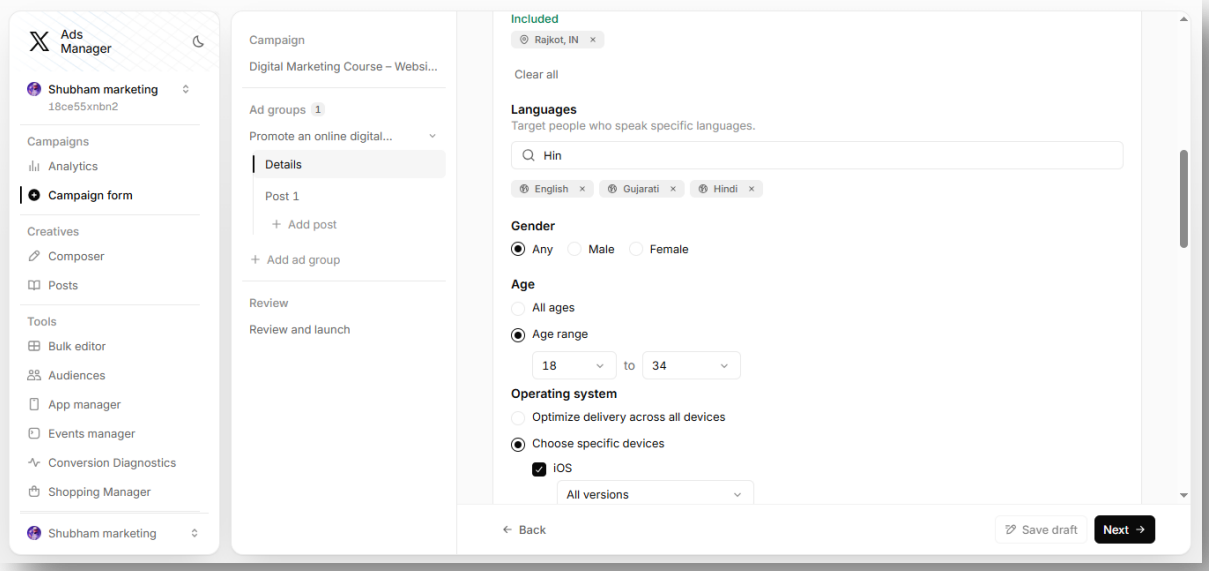

---

1. Take screenshots of the objective, audience, budget, ad creative and final review screens.

For the assignment, label the screenshots **Step 1, Step 2, Step 3**, etc., so the workflow is easy to verify.

---

5. X Ads billing & payment options in India

Digital Marketing Assignment

Session – 13

1. X Ads Comparison Table

Ad Type	Main Objective	Placement	Ideal Use Case
Promoted Tweets	Increase engagement, awareness, website traffic, or conversions	X home timeline and relevant feeds	Promoting a product, offer, post, or campaign
Followers Ads	Gain new followers	Home timeline and profile-related	Growing a brand, creator, news, or

		placements	business account
App Install Ads	Drive app installs and app engagement	X timeline and other eligible X placements	Launching or promoting a mobile app

---

2. Zomato App Install Ad – Ahmedabad

---

3. ₹10,000 Budget for a Music Playlist App

I would split the budget like this:

Budget Area	Amount	Strategy
Audience Bidding	₹7,000	Bid competitively to reach users interested in music, playlists, artists, and streaming
Daily Limits / Maximum Reach	₹3,000	Set controlled daily spending to maintain consistent exposure
Total	**₹10,000**	

Justification:
I would allocate **70% to audience bidding** because reaching the right music-interested audience is more important than simply generating impressions. The remaining **30%** would be used for daily limits so the campaign does not spend the entire budget too quickly and can maintain visibility throughout the campaign period.

For example, over 10 days, the ₹3,000 reach budget could be controlled at around **₹300 per day**, while the bidding budget is used to compete for valuable users.

---

4. Case Study – Swiggy on X

Brand: Swiggy
Campaign type: Hypothetical X Promoted Tweet campaign

Swiggy could launch an X campaign promoting a special **"Late-Night Cravings"** food-delivery offer.
The objective would be to increase app orders and engage users discussing hunger, food, and late-night meals.
Swiggy could use **Promoted Tweets** featuring visually appealing food images and a limited-time discount.
The campaign could target food lovers in major Indian cities and users engaging with food-related conversations.
A short copy such as **"Midnight hunger? Let Swiggy handle it. □"** would fit naturally into the X feed.
The campaign could succeed because it combines **timely messaging, strong visuals, a clear offer, and an immediate CTA**.

---

5. Three AI-Generated Followers Ad Headlines for an IPL Cricket Handle

AI Suggestions

1. **□ Every IPL Update. One Follow Away!**
2. **□ IPL Buzz Starts Here — Follow Now!**
3. **□ Scores, News & IPL Drama — Follow Us!**

My Choice

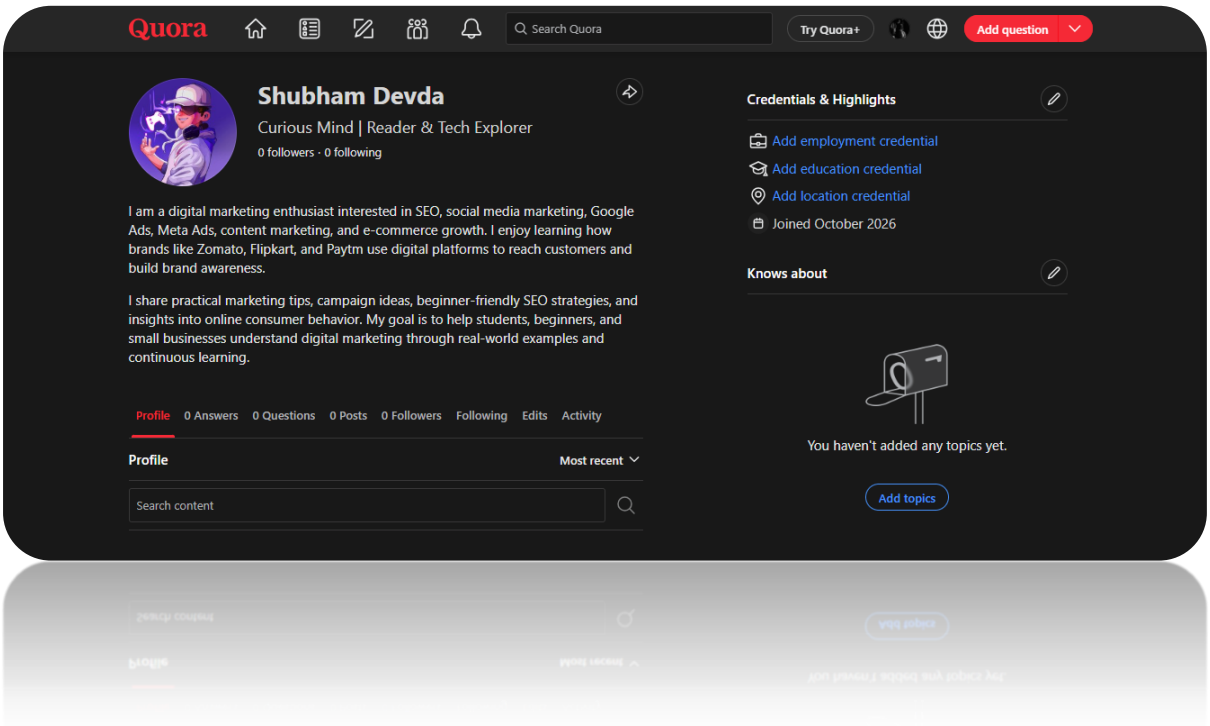

I would choose "□ **Every IPL Update. One Follow Away!"**

Why: It is short, easy to remember, and directly communicates the benefit of following the cricket handle. It also creates a sense that users might miss important IPL updates if they don't follow the account.

Digital Marketing Assignment

Session – 14

1. Create an authority-building Quora profile

---

2. Research and answer two questions on Quora

How do I improve SEO for digital marketing?

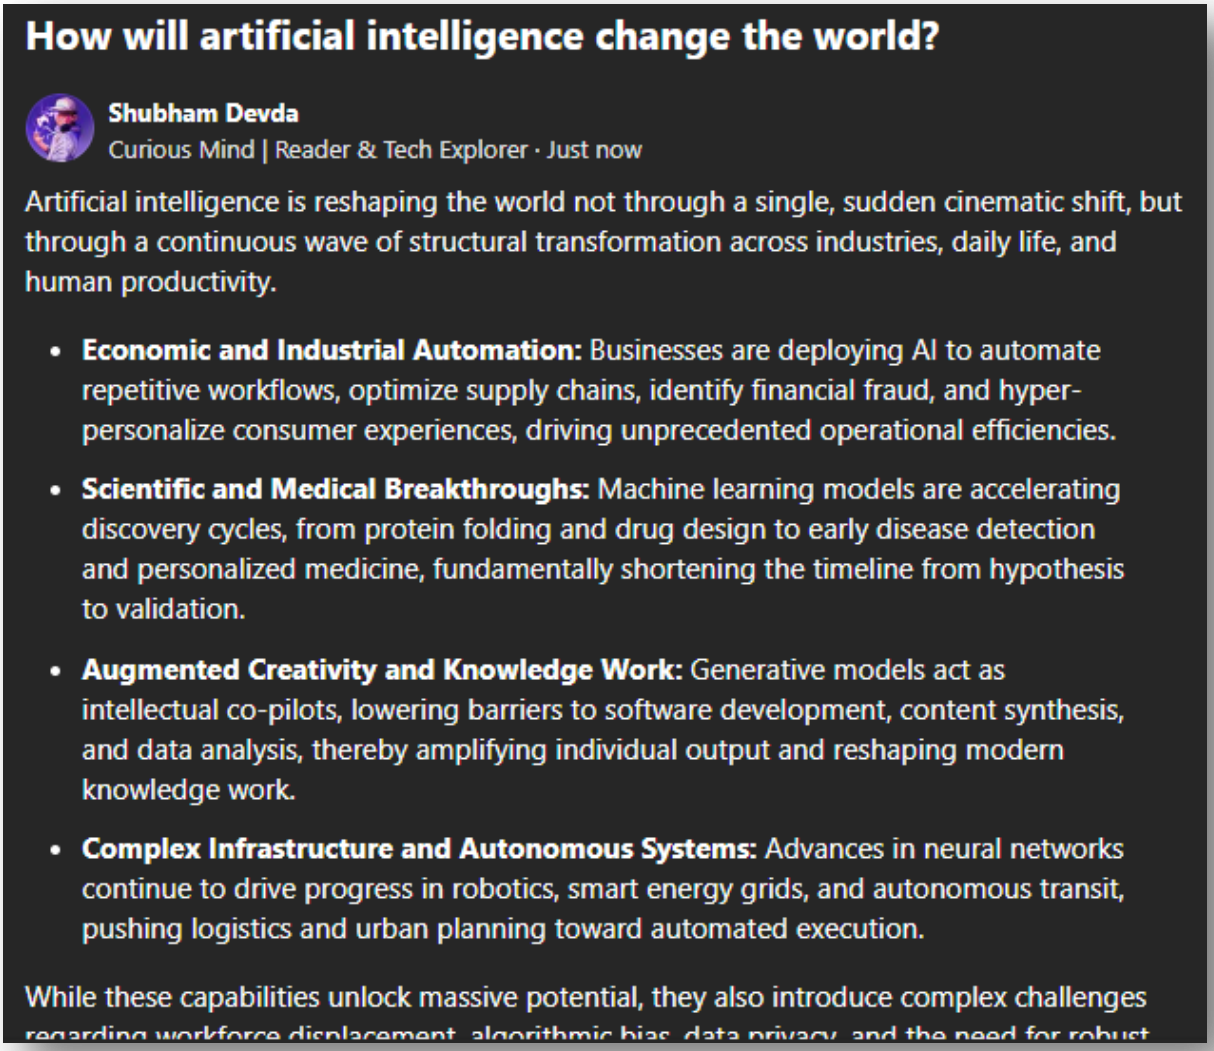

Shubham Devda
Curious Mind | Reader & Tech Explorer · Just now

Improving SEO for digital marketing involves a combination of **on-page optimization**, **technical adjustments**, **content strategy**, and **off-page authority building**.

- **Keyword Research & Optimization:** Target specific keyword phrases for each piece of authoritative content. Optimize your meta tags, title tags, headings, and descriptions to ensure search engines can easily understand your pages.
- **High-Quality Content Creation:** Focus on producing valuable, authoritative, and engaging content that directly answers user intent and keeps visitors on your site longer.
- **Technical SEO:** Improve site speed, ensure complete mobile-friendliness, and utilize SEO plugins like Yoast or Rank Math to streamline technical adjustments.
- **On-Page Elements:** Use proper header tags, internal links to connect related pages, and optimize your Click-Through Rate (CTR) with compelling titles.
- **Off-Page Authority:** Build trust and credibility through quality backlinks and online reputation signals.
- **Analytics & Performance Tracking:** Regularly monitor your organic traffic and rankings using tools like Google Analytics and Search Console to continuously refine your strategy.

How will artificial intelligence change the world?

Shubham Devda
Curious Mind | Reader & Tech Explorer · Just now

Artificial intelligence is reshaping the world not through a single, sudden cinematic shift, but through a continuous wave of structural transformation across industries, daily life, and human productivity.

- **Economic and Industrial Automation:** Businesses are deploying AI to automate repetitive workflows, optimize supply chains, identify financial fraud, and hyper-personalize consumer experiences, driving unprecedented operational efficiencies.
- **Scientific and Medical Breakthroughs:** Machine learning models are accelerating discovery cycles, from protein folding and drug design to early disease detection and personalized medicine, fundamentally shortening the timeline from hypothesis to validation.
- **Augmented Creativity and Knowledge Work:** Generative models act as intellectual co-pilots, lowering barriers to software development, content synthesis, and data analysis, thereby amplifying individual output and reshaping modern knowledge work.
- **Complex Infrastructure and Autonomous Systems:** Advances in neural networks continue to drive progress in robotics, smart energy grids, and autonomous transit, pushing logistics and urban planning toward automated execution.

While these capabilities unlock massive potential, they also introduce complex challenges regarding workforce displacement, algorithmic bias, data privacy, and the need for robust

---

3. Analyze the top five answers to a trending Quora question

For this analysis, use the question topic:

“How can small businesses in India grow using digital marketing?”

Search for this question on Quora and choose five leading answers with substantial relevance, engagement, or helpful detail. The table below is an analysis template with common authority-building patterns, not a verified audit of five specific live answers.

Answer to examine	Trust-building strategy	What to look for
Answer 1	Data and evidence	Reliable statistics, cited research, or clearly explained metrics

Answer 2	Personal storytelling	A real experience, challenge, or lesson learned
Answer 3	Step-by-step guidance	Specific actions, examples, and practical instructions
Answer 4	Relevant credentials	Demonstrable experience, projects, or expertise shown on the author's profile
Answer 5	Balanced recommendations	Limitations, alternatives, risks, and realistic expectations

Three strategies that build trust and authority

1. Data and evidence

Strong answers support important claims with credible sources, accurate figures, or clearly explained examples. For example, an answer about advertising should explain CTR, conversion rate, or cost per lead rather than simply claiming that a campaign was successful.

2. Storytelling and practical examples

Authors can make complex concepts understandable by explaining a genuine experience or a realistic case study. A food delivery marketing example involving Zomato, for instance, can illustrate audience segmentation and promotional messaging without pretending to have access to the company's internal campaign data.

3. Profile credibility and transparency

Relevant credentials, demonstrated projects, clear writing, and honest limitations make an author more trustworthy. A strong profile should support the answer's subject instead of relying on an impressive-sounding title alone.

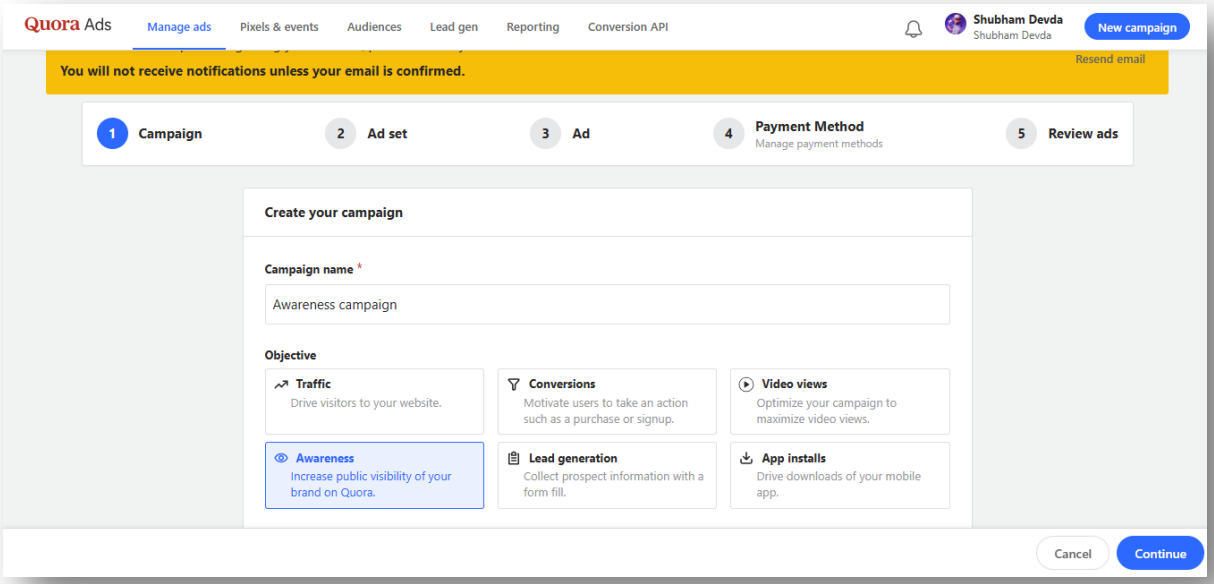

How to complete the real five-answer analysis

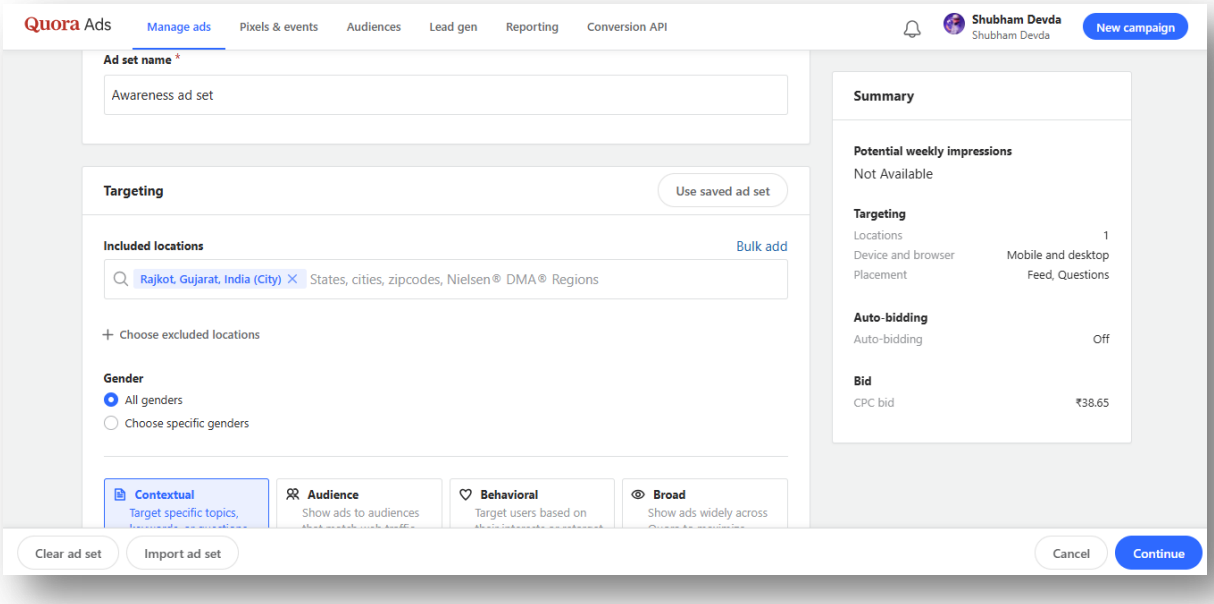

For each of the five answers you select, record its author, answer link, visible upvotes or other engagement indicators, use of sources, personal examples, and profile credentials. Then identify which of the three strategies appears strongest in that particular answer.

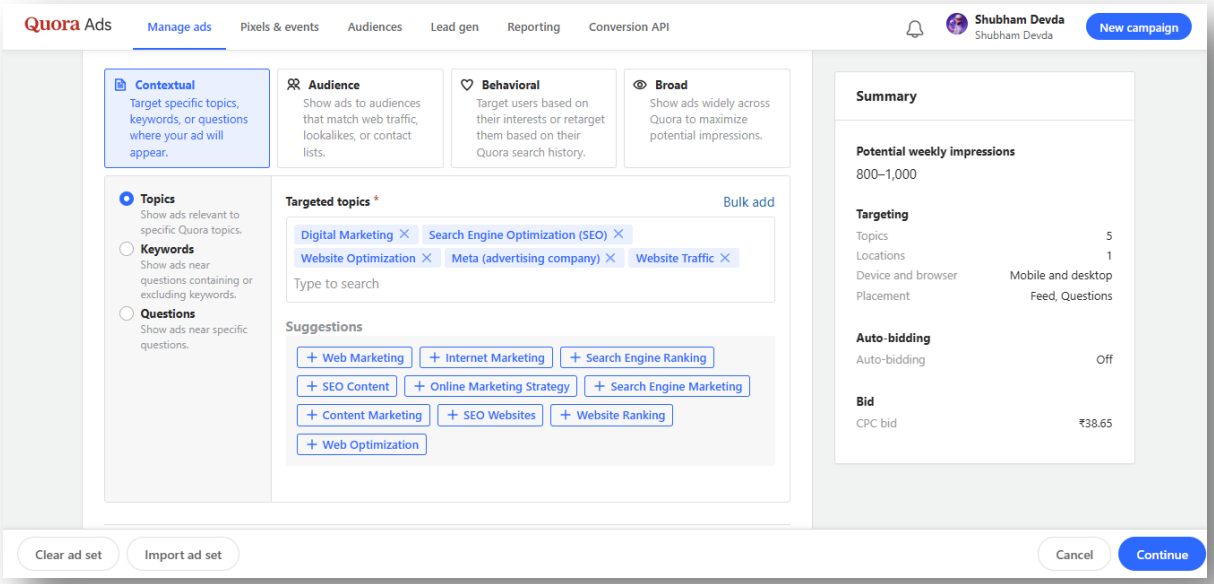

Do not assume that the most-upvoted answer is automatically the most accurate. Engagement is a useful observation, not proof of factual reliability.

5. Generate three alternative headlines or answer hooks

Three generated alternatives

Option 1

“Need Music to Focus? Try This Spotify Study Playlist”

Why it works: It identifies a common student need and clearly communicates the benefit.

Copy headline

Option 2

“My Go-To Study Music: A Playlist for Long Study Sessions”

Why it works: It sounds personal and suggests a practical recommendation.

Copy headline

Option 3

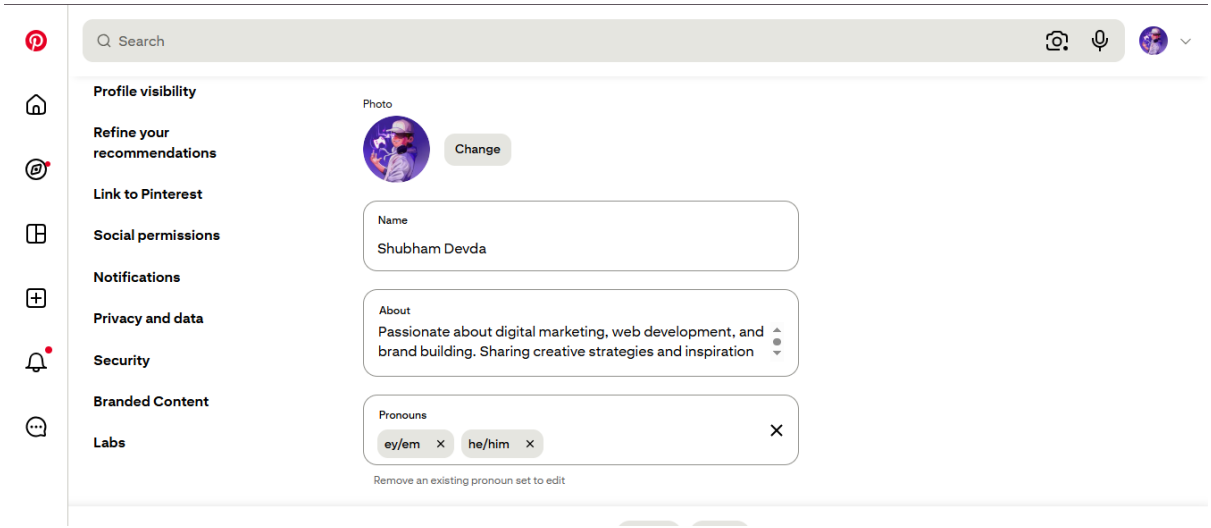

“Lo-Fi, Instrumentals or Ambient Music: What Should You Play While Studying?”

Why it works: It creates curiosity and invites readers to explore different music styles.

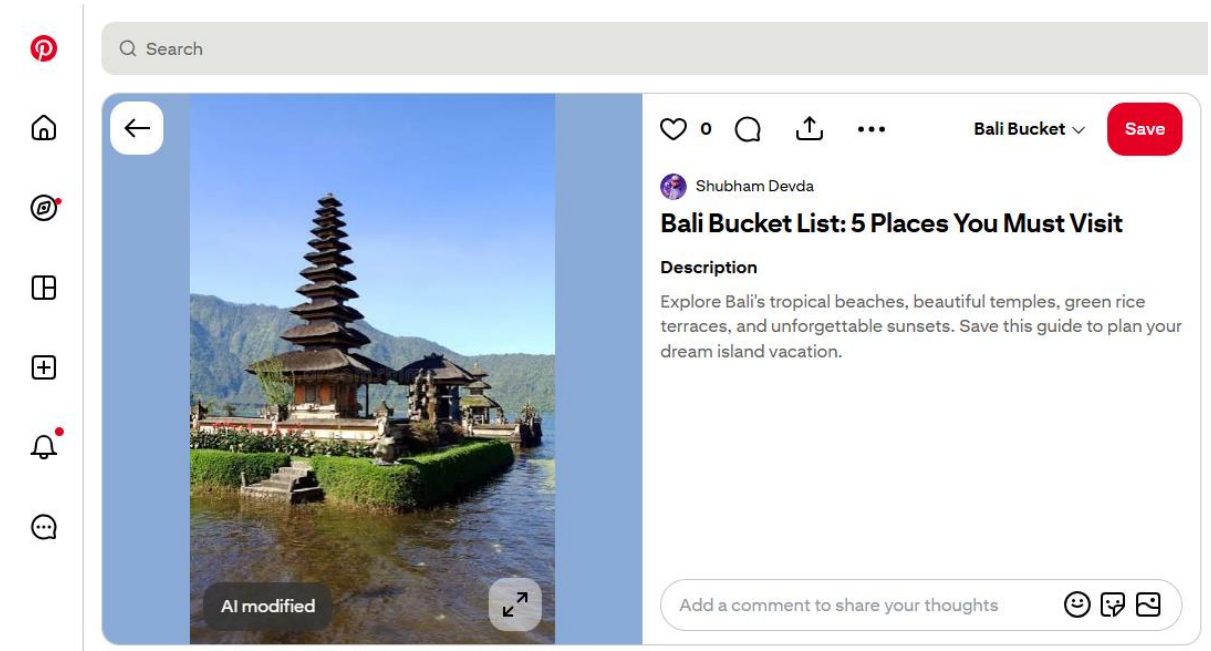

Digital Marketing Assignment

Session – 15

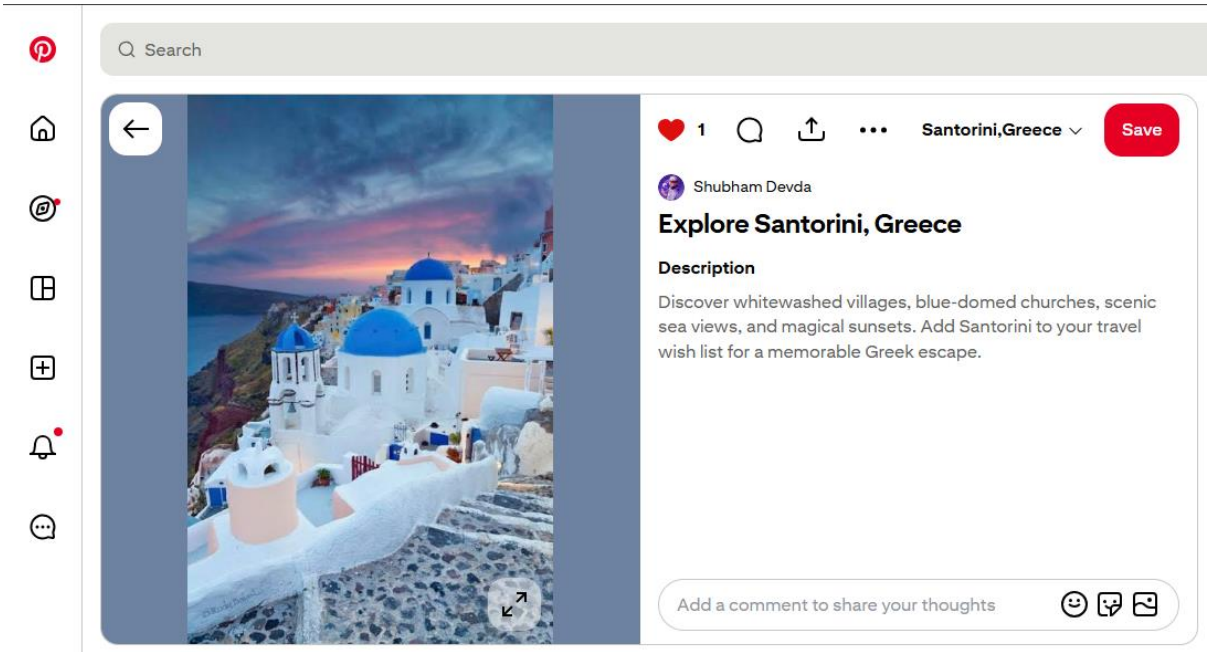

1. Create and optimize a Pinterest business profile

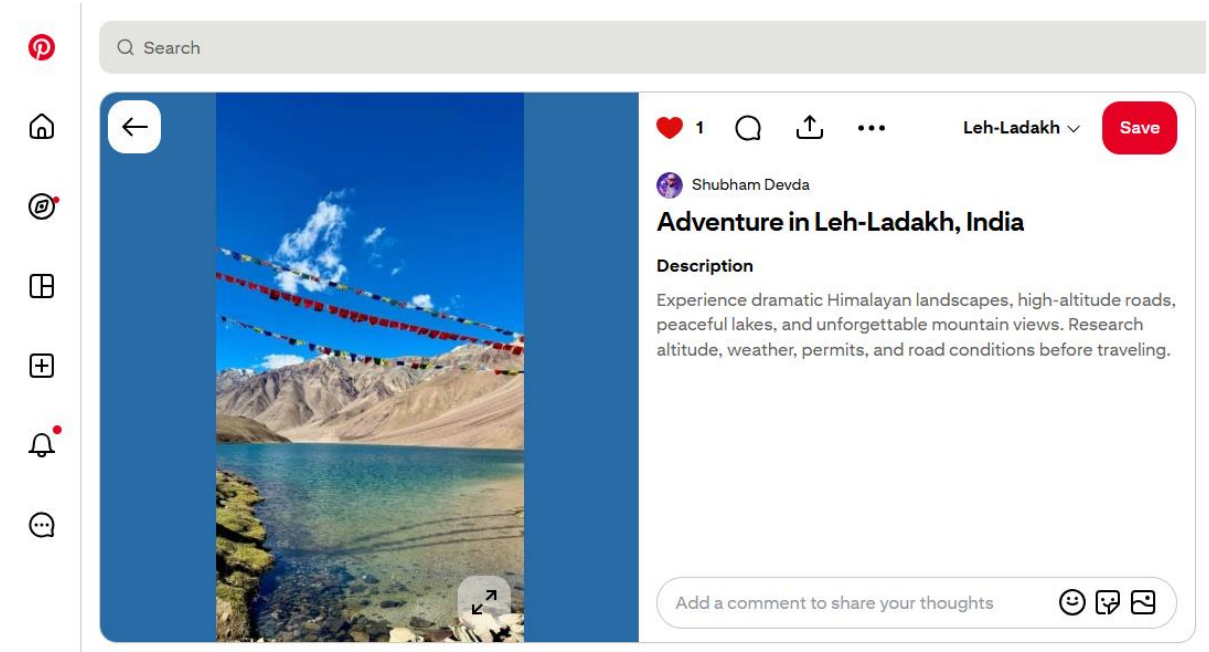

2. Design three travel Idea Pins

Day	Pin topic	Pin type	Target keywords

3. One-week Pinterest content calendar for a fashion brand

Example brand: RS Boutique. Since your fashion brand focuses on women's clothing, this calendar uses women's fashion, ethnic wear, festive collections, and styling inspiration.

Sample schedule: Monday, October 12 – Sunday, October 18, 2026. These are suggested publishing dates, not published posts.

Mon, Oct 12	Everyday casual outfit ideas	Standard Pin	women's casual wear, everyday outfits
Tue, Oct 13	5 ways to style a kurti	Idea-style multi-page Pin	kurti styling, ethnic fashion, Indian wear
Wed, Oct 14	Festive outfit transition video	Video Pin	festive outfits, women's ethnic wear
Thu, Oct 15	Anarkali suit collection	Standard Pin	Anarkali suits, ethnic dresses for women
Fri, Oct 16	How to style handbags and accessories	Idea-style multi-page Pin	women's accessories, handbag styling
Sat, Oct 17	Navratri outfit inspiration	Video Pin	Navratri outfits, chaniya choli, garba fashion
Sun, Oct 18	New arrivals and customer looks	Standard Pin	women's fashion trends, boutique collection

---

4. Pinterest Analytics: sample dashboard and three insights

The following is fictional sample data for the assignment, not actual business analytics.

Impressions

48,600

Saves

3,240

Engagements

5,180

Outbound clicks

1,120

Insight 1: High impressions

Casual outfit Pins received the highest reach in the sample data. This suggests that everyday fashion inspiration may attract a broad audience.

Insight 2: More saves

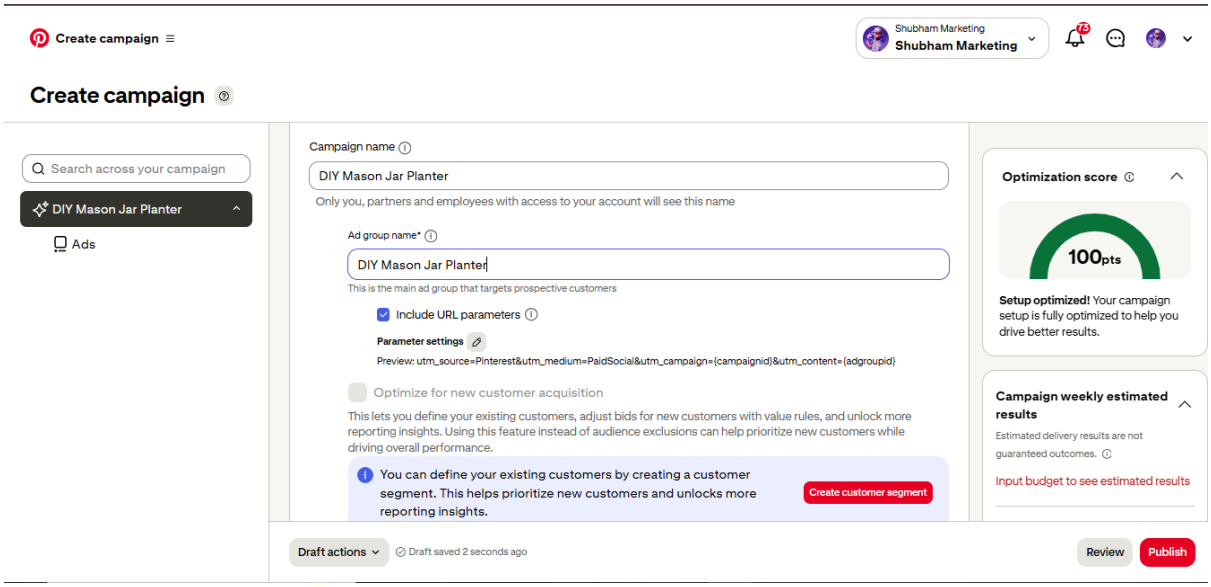

Fashion inspiration Pins received strong saves, indicating that users found the content useful enough to revisit later.

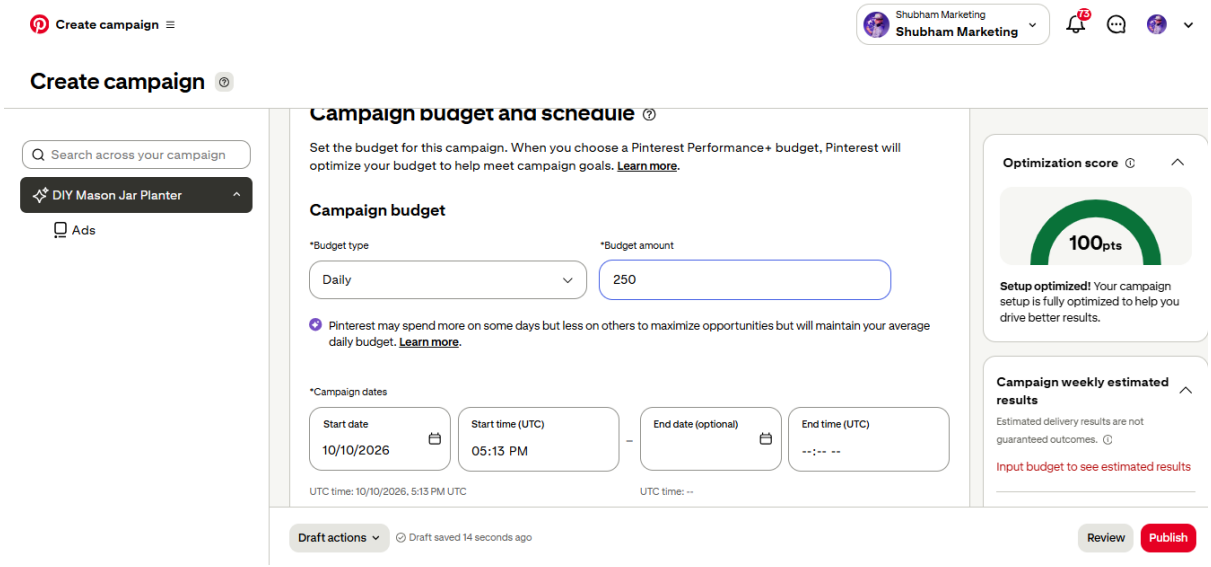

Insight 3: Outbound clicks

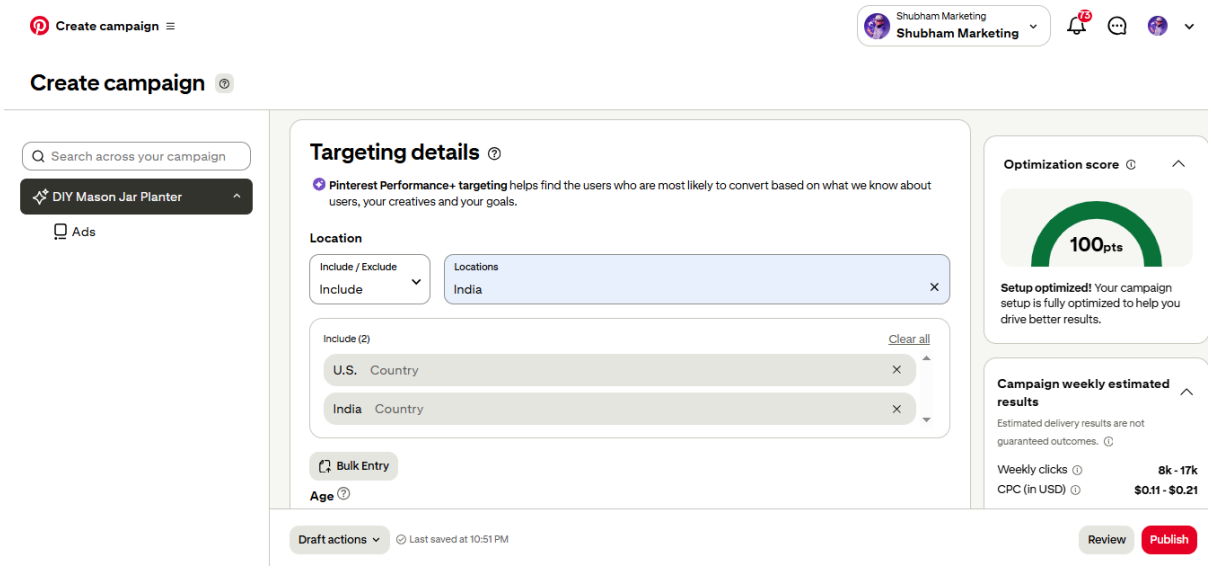

Outbound clicks indicate that users visited the linked website. Product Pins with clear images, relevant descriptions, and useful links can help drive website traffic.

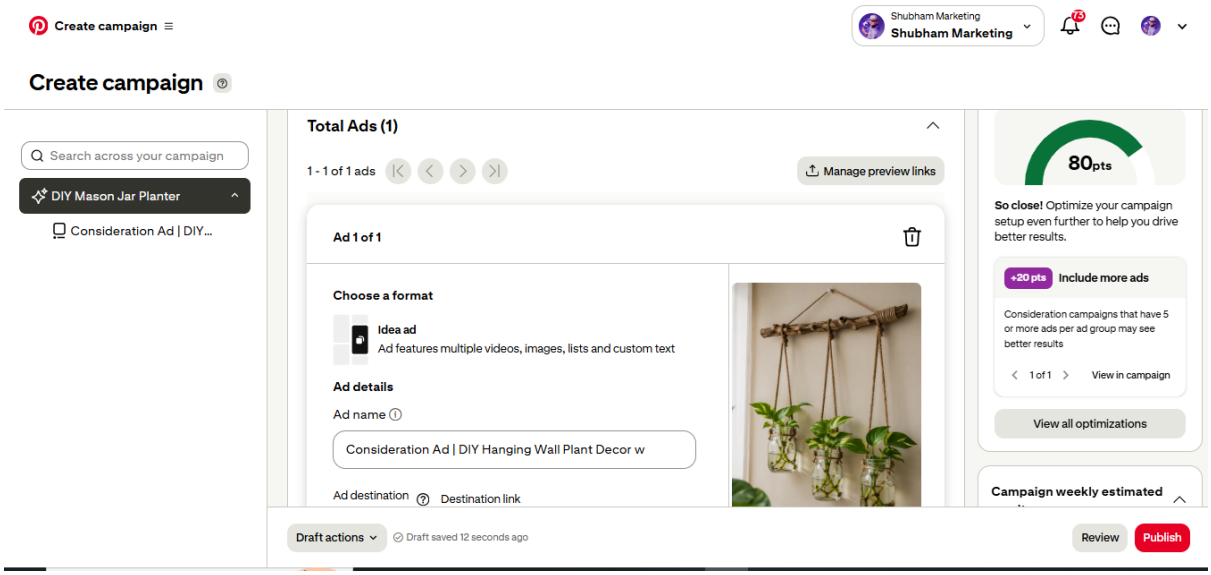

---

5. Pinterest Ads campaign for a DIY project

Digital Marketing Assignment

Session – 16

1. Best-Performing Content Types on Two Social Media Platforms

Platform 1: Instagram

1. Reels: Short videos get attention quickly and can reach new audiences.
2. Stories: Polls, questions, and daily updates help followers interact with the page.

3. Carousel Posts: Multiple images or tips encourage people to swipe and spend more time on the post.

Platform 2: Facebook

1. Videos: Entertaining and informative videos attract viewers and shares.
2. Offers and Deal Posts: Discounts and special offers encourage people to comment and share.
3. Live Videos: Live sessions help connect with followers and answer their questions directly.

---

2. SWOT Analysis for a New Instagram Food Review Page

SWOT	Explanation
Strength	Honest food reviews can build trust among followers.
Weakness	A new page has fewer followers and limited reach.
Opportunity	Collaborating with local restaurants can attract more followers.
Threat	Many other food bloggers are already creating similar content.

---

3. Content Strategy for a Flipkart-Style Deals Page on Facebook

- Post daily discount offers on electronics, clothing, and home products to attract buyers.
- Share short videos showing product features and comparing prices.
- Use Stories to share flash sales and limited-time deals.
- Post product reviews and shopping tips to build trust.
- Encourage followers to comment, share deals, and tag their friends to increase organic reach.

---

4. Instagram Bio and CTA for a Music Playlist Page

Page Name: Melody Mix

 Your Daily Dose of Music
 Playlists for Every Mood
 Trending Hits | Chill Vibes | Love Songs
 Follow us for your daily music fix!

 DM **“PLAYLIST”** to get your favourite playlist.

CTA (Call-to-Action): “DM us ‘PLAYLIST’ to discover your perfect music playlist!”

Why it works: The bio clearly explains the page's purpose and encourages users to send a message, helping generate organic leads and build engagement.

---

5. Redesign a Facebook Page for a Local Cricket Fan Club

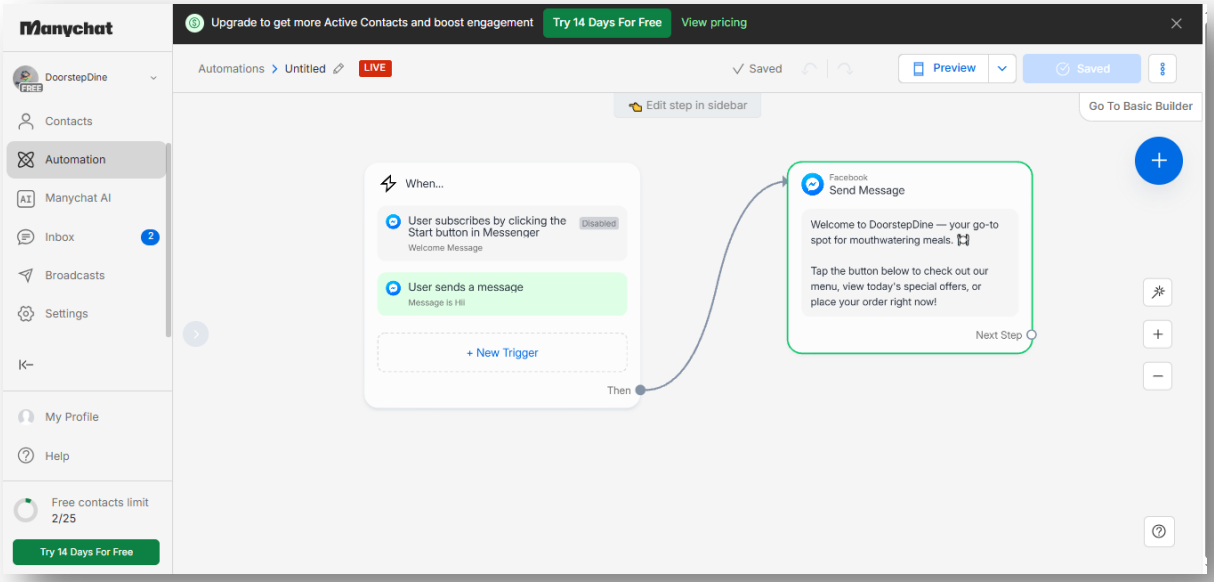

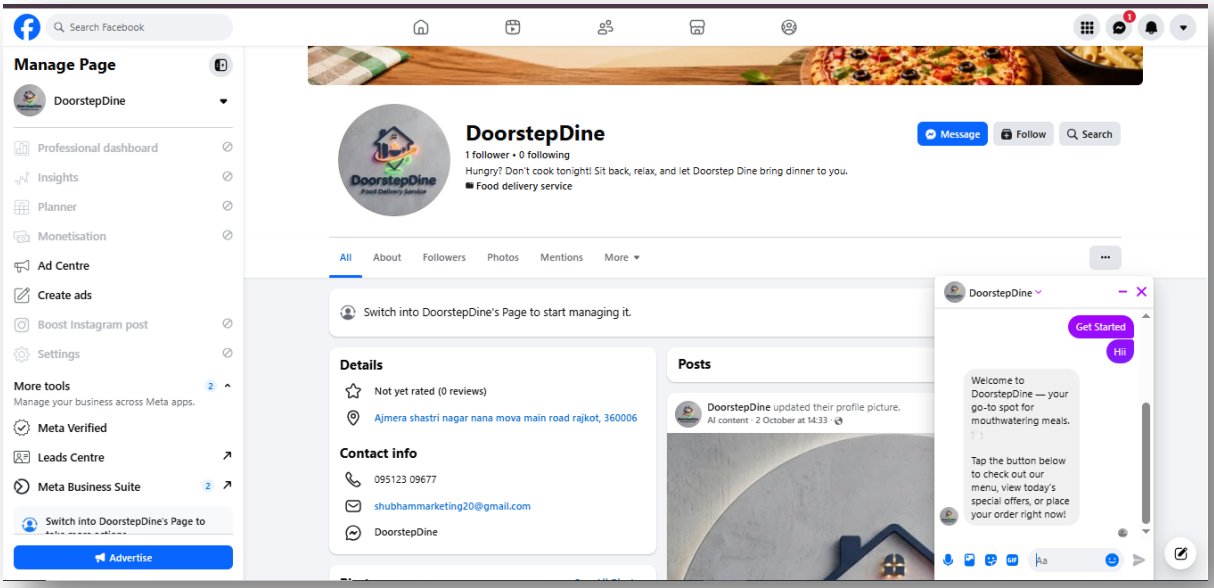

Digital Marketing Assignment

Session – 17

1. Create a ManyChat chatbot for Facebook Messenger

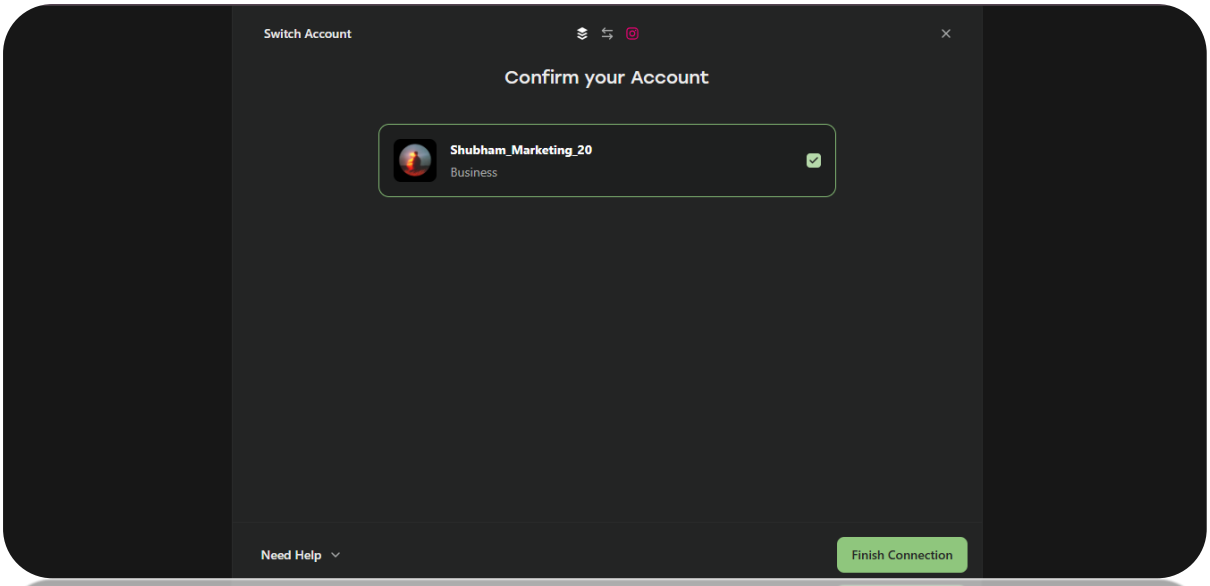

Business name: Door Step Dine (fictional food delivery app)

3. One-week social media content calendar for a food delivery app

Business name: Foodie Express

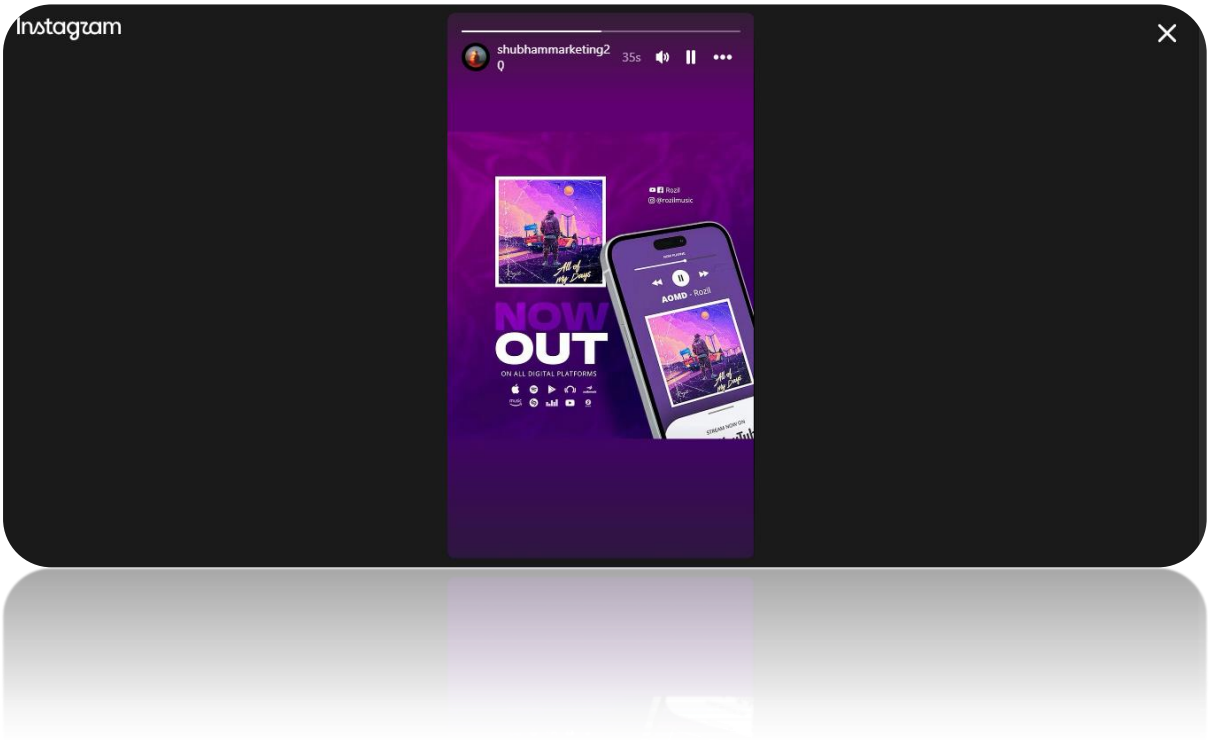

Objective: Increase brand awareness, engagement, app installs, and food orders through Instagram, Facebook, and X (Twitter).

Day	Platform	Content type	Post topic	Suggested time (IST)
Monday, Oct 19	Instagram	Food image	Delicious meal of the day	12:30 PM
Tuesday, Oct 20	Facebook	Offer post	20% off on first order	6:00 PM
Wednesday, Oct 21	X (Twitter)	Funny meme	When your food arrives early	11:00 AM
Thursday, Oct 22	Instagram	Story / Poll	Choose your favourite: Pizza or Burger	5:00 PM
Friday, Oct 23	Facebook	Carousel	Top 5 dishes to try this weekend	1:00 PM
Saturday, Oct 24	Instagram	Reel	Behind-the-scenes food preparation	7:00 PM
Sunday, Oct 25	X (Twitter)	Text post	Weekend food cravings and app promotion	10:00 AM

Expected result: Consistent posting can improve audience engagement, increase brand visibility, attract new customers, and encourage more app orders.

---

4. Promotional Instagram Story image for a new playlist launch

---

5. Five creative social media post ideas for a small business

Business selected: The Cozy Cup Café

No.	Post idea	Caption idea	How to visualize using Canva or CapCut
1	New menu launch	“Meet your new favourite coffee! □ Try our latest creation today.”	Canva: Add a coffee photo, bold headline, logo, and warm colours.
2	Customer review	“Your love keeps us brewing! ❤□ Thank you for choosing us.”	Canva: Create a testimonial card with a customer review and star ratings.
3	Behind the scenes	“Fresh ingredients, skilled hands, and lots of love in	CapCut: Create a 15–20 second Reel showing coffee preparation with music

		every cup!”	and captions.
4	Special discount	“Weekend treat! □ Enjoy 20% off selected café favourites.”	Canva: Design a promotional graphic with large discount text, product images, and a CTA.
5	Café atmosphere	“Good coffee, great company, and the perfect place to relax.”	CapCut: Make a short cinematic video showing the café interior, coffee, seating, and ambience.

Conclusion: These five ideas combine promotional, educational, entertaining, and trust-building content. Using Canva for graphics and CapCut for videos helps a small café maintain a consistent visual identity and attract more customers through social media.

Digital Marketing Assignment

Session – 18

1. Comparison of Instagram and YouTube Algorithms

Instagram and YouTube use algorithms to recommend content based on users’ interests, activity, and interactions. Their main goal is to show users content they are likely to enjoy.

Factor	Instagram	YouTube
User engagement	Ranks content based on likes, comments, shares, saves, and interactions.	Considers views, likes, comments, and other engagement signals.
User interests	Recommends Reels and posts based on accounts followed and content previously viewed.	Recommends videos based on watch history and topics the user enjoys.
Watch time	Considers how long users watch Reels and videos.	Watch time and viewer retention help indicate whether a video satisfies viewers.
Content relevance	Uses information about the post, its popularity, and its audience.	Considers video relevance, performance, and how well it matches a viewer's interests.

Conclusion: Instagram is particularly useful for discovering visual content, Reels, and trends, while YouTube is strong for recommending videos based on viewing habits and viewer satisfaction.

2. One-Week Instagram Content Calendar for a Food Delivery App

Fictional brand: QuickBite – Food Delivered Fast

Target audience: Students, working professionals, and food lovers. Time zone: IST (India).

Day	Posting time	Content type	Post description
Monday	12:00 PM	Food Reel	Show delicious lunch options with the caption "Your lunch cravings, delivered!"
Tuesday	7:00 PM	Carousel	Showcase five popular dishes available on QuickBite.
Wednesday	6:30 PM	Story Poll	Ask followers: "What are you craving today — Pizza or Burger?"
Thursday	7:00 PM	Customer Review	Share a customer testimonial highlighting fast delivery and tasty food.
Friday	7:30 PM	Promotional Reel	Promote a weekend offer with a clear "Order Now" call to action.
Saturday	12:30 PM	Behind-the-scenes Reel	Show food preparation, packaging, and delivery.
Sunday	6:00 PM	Engagement Post	Ask followers to share their favourite comfort food and tag a friend.

Posting consistency and cadence: QuickBite will publish one main piece of content every day, using a mix of Reels, carousels, Stories, and engagement posts. Posting around lunch and evening meal times helps reach people when they may be deciding what to eat. The schedule also provides a consistent presence without relying on the same content format every day.

3. Generate 10 Content Ideas for a Music Playlist Sharing Feature

Fictional app: MusicVibe — a Spotify-style app that lets users create, share, and discover playlists.

Prompts used in ChatGPT

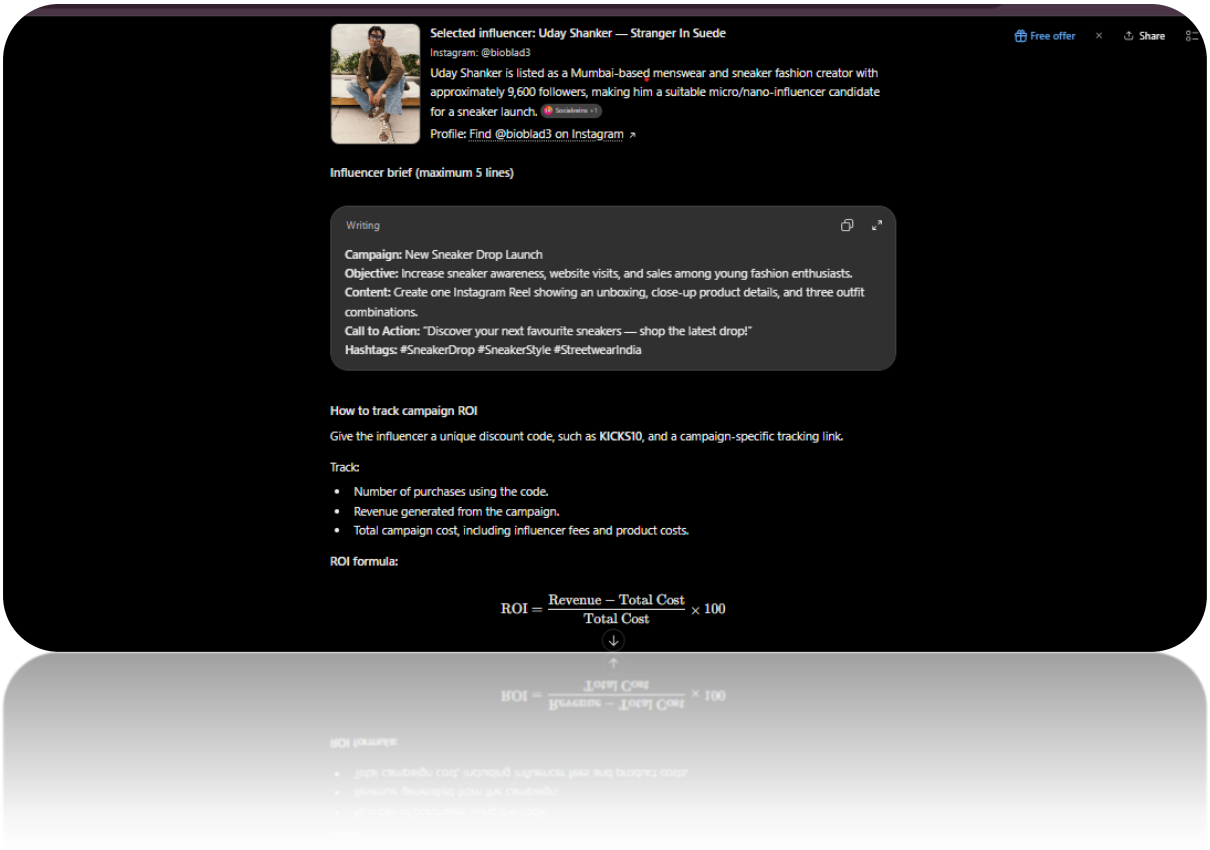

1. Generate 10 creative social media content ideas for a new music playlist-sharing feature in a Spotify-style app.
2. Suggest engaging Instagram Reel ideas that encourage users to create and share their favourite music playlists.
3. Create viral campaign ideas for music lovers, college students, and Gen Z audiences.
4. Suggest interactive features and challenges that encourage users to share playlists with friends.
5. Generate ideas for promoting personalized playlists based on mood, activities, and music taste.

10 fresh content ideas

No.	Content idea	Short description
1	Mood-Based Playlists	Create playlists for happy, sad, relaxed, or energetic moods.
2	Share Your Vibe	Encourage users to share their favourite playlist on

		Instagram Stories.
3	Guess the Song Challenge	Share a short music clip and ask followers to guess the song.
4	Friendship Playlist	Invite friends to collaborate on one playlist.
5	Weekend Music Challenge	Ask users to share five songs for their perfect weekend.
6	Trending Song Reels	Create Reels featuring popular songs and encourage playlist saves.
7	Music Personality Quiz	Match users with a music personality based on their choices.
8	Study Focus Playlist	Promote playlists for studying, reading, and concentration.
9	Throwback Thursday	Encourage users to share favourite songs from their childhood.
10	Playlist of the Week	Feature a community-created playlist every week.

4. Instagram Micro-Influencer Campaign for a Sneaker Drop

---

5. Sample SMO Client Report — Weekly Performance

Digital Marketing Assignment

Session – 19

1. Five catchy Instagram captions for a new café menu launch

Café name: The Urban Café New menu item: Loaded Cheese Burger

Caption 1 — Exciting launch

Something cheesy is landing! □□ Meet our NEW Loaded Cheese Burger — one bite and you're in love. Visit us today!

#Foodie #BurgerLovers #NewMenu #Foodstagram

Copy caption

Caption 2 — Cravings

Your cravings called, and we answered! □ Try our latest cheesy creation and make your food dreams come true.

#FoodiesOfInstagram #FoodLovers #CheeseLovers

Copy caption

Caption 3 — Friends and fun

Tag your burger buddy! □❤□ Our new menu item is here, and it's too delicious to enjoy alone. Who's joining you?

#FoodieLife #BurgerTime #FoodLovers

Copy caption

Caption 4 — Premium food appeal

Golden, crispy, cheesy, and made to impress! □ Your next favourite bite awaits at The Urban Café.

#InstaFood #FoodPhotography #Foodstagram

Copy caption

Caption 5 — Launch promotion

NEW ON THE MENU! □ Meet the burger everyone's going to talk about. Come taste it before the launch offer ends!

#FoodDeals #Foodie #BurgerLovers #CafeHopping

Copy caption

---

2. One-week Instagram content calendar for a fashion brand

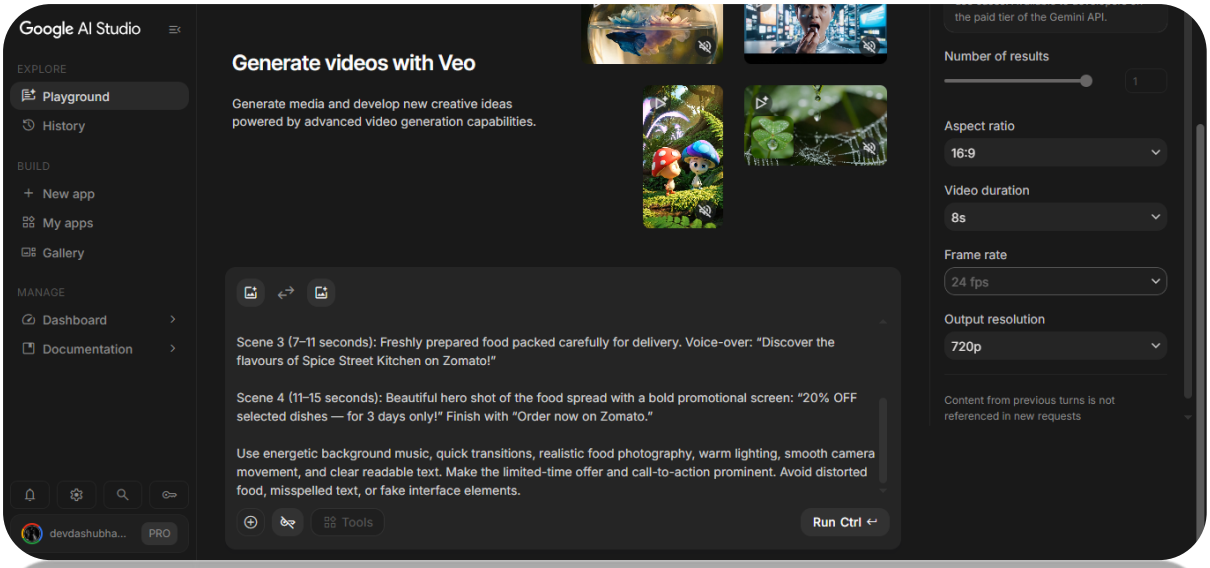

Brand name: RS Boutique Goal: Increase brand awareness, engagement, and sales among women interested in fashionable outfits.

Day	Post type	Content idea and suggested caption	Hashtags
Monday	Image	New week, new style! □ Discover your next favourite outfit at RS Boutique.	#Fashion #OOTD #RSBoutique
Tuesday	Reel	Three outfits, three moods! Which look is your favourite? □	#FashionReels #StyleInspo #Trending
Wednesday	Story	Vote for your favourite: ethnic wear or western wear? □	#FashionPoll #StyleYourWay
Thursday	Image	Elegance never goes out of style. Explore our latest collection.	#WomensFashion #FashionLovers #EthnicWear
Friday	Reel	Get ready with us! Transform your everyday look into a stunning outfit.	#GRWM #FashionInspo #OOTD
Saturday	Story	Weekend style alert! Reply to discover an outfit perfect for you.	#WeekendStyle #ShopLocal
Sunday	Reel	Your Sunday style inspiration is here! Save this look for your next outing.	#SundayStyle #FashionReels #StyleInspiration

Posting strategy: Publish one main post or Reel daily and use Stories to interact with followers. Maintain a consistent schedule, use attractive product visuals, reply to comments, and include a clear call-to-action such as “DM us to order.”

5. Ten video ad hooks for a payments app like PhonePe

Campaign objective: Promote a new feature called Split Smart, which helps friends split shared expenses and track who owes what.

1. The relatable problem “Still calculating who owes whom after every dinner? There's a smarter way!”

1. The relatable problem “Still calculating who owes whom after every dinner? There's a smarter way!”

2. The friendship hook “Friends forever, but bill calculations never end? □”

3. The curiosity hook “What if splitting a bill took less time than ordering your food?”

4. The convenience hook “One outing. One simple way to manage everyone's share.”

5. The roommate hook “Rent, groceries, electricity… tired of tracking every shared expense?”

6. The surprise hook “Your next favourite payment feature might be the simplest one yet!”

7. The travel hook “Road trips are fun. Chasing your friends for money? Not so much!”

8. The speed hook “Less time splitting bills, more time living your life.”

9. The humour hook “POV: Everyone says ‘I'll pay you later’… and nobody remembers!”

10. The bold hook “Meet the smarter way to handle shared expenses. Your group chat will thank you!”

Best hook: Number 9 — The humour hook

Selected hook: “POV: Everyone says ‘I'll pay you later’… and nobody remembers!”

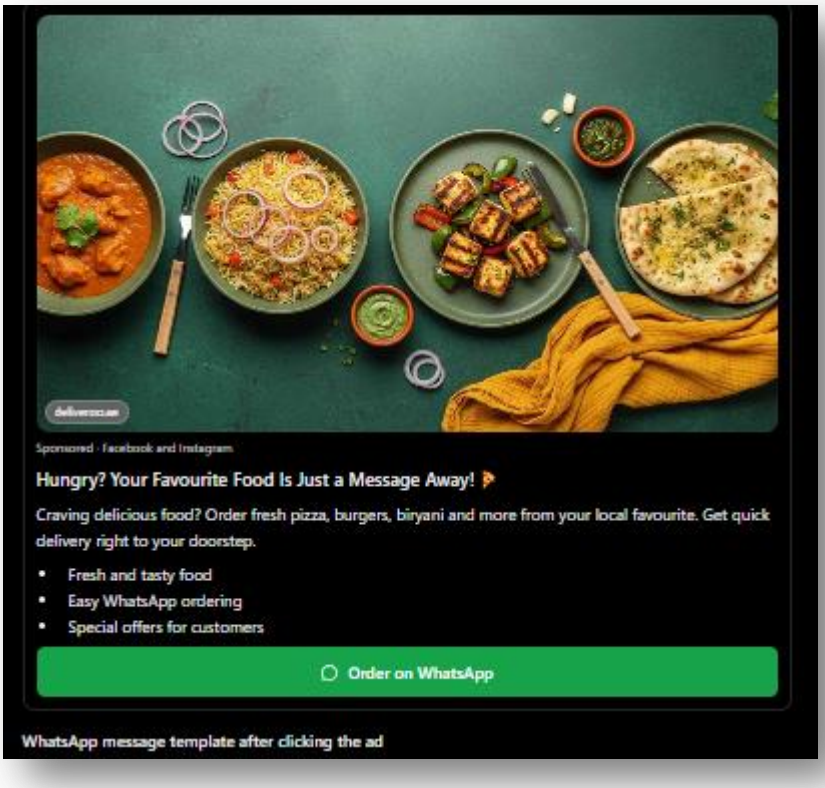

Why it works:

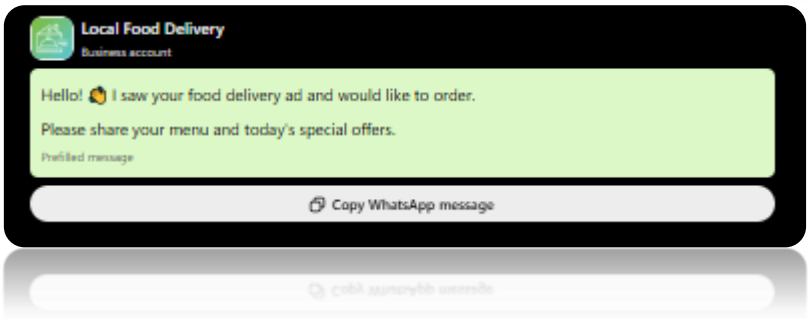

- Relatable: Many friends experience this problem when sharing bills.
- Attention-grabbing: The POV format feels natural for Instagram Reels and YouTube Shorts.
- Emotional connection: Humour makes the ad memorable and encourages people to tag their friends.
- Clear solution: The video can introduce the Split Smart feature as a convenient way to track shared expenses.
- Engagement potential: Viewers may comment with funny stories about friends who never repay them.

Digital Marketing Assignment

Session – 20

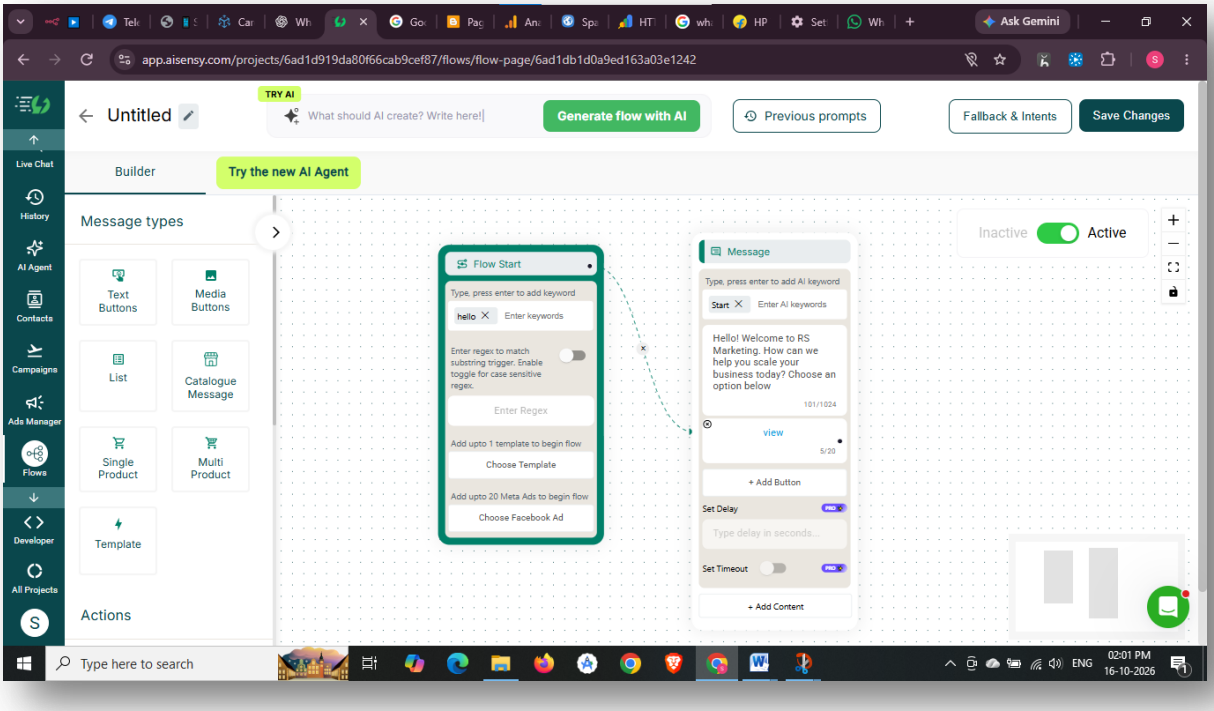

1. Mock Click-to-WhatsApp Ad for a Local Food Delivery Service.

---

2. Set Up an Automated WhatsApp Reply Flow Using WATI or AiSensy

---

3. Meta AI Business Assistant (MABA): Three Uses for Small Businesses

Meta AI Business Assistant helps businesses with marketing-related tasks, content creation, campaign planning and business profile improvements. Meta also offers a customer-facing AI agent that can answer customer questions and assist with sales. These are related but distinct capabilities.

Use case	How it helps	Example
1. Automated customer support	An AI agent can answer common questions around the clock.	A restaurant automatically answers “What are your opening hours?” on WhatsApp.
2. Product recommendations	AI can recommend relevant products based on customer needs.	A clothing store suggests dresses based on a customer's preferred style and budget.
3. Marketing and content creation	The assistant can help create product descriptions, catalog images and campaign ideas.	A boutique generates a festive collection description and promotional content for WhatsApp.

Benefits: Faster responses, reduced repetitive work, better customer experiences and more opportunities to convert enquiries into sales. Features and availability depend on the specific assistant and eligible business account.

4. Meta Andromeda Update: Two Major Changes and Their Marketing Impact

Important clarification: Andromeda is Meta's AI-powered advertising retrieval system, not an update exclusive to WhatsApp Business. It helps Meta select relevant ads to consider showing to each person. Its impact on WhatsApp marketing is indirect, through Meta's advertising system and click-to-message campaigns.

Major change	Explanation	Impact on digital marketing
1. AI-powered ad personalization	Andromeda uses advanced machine learning to identify relevant ads from a very large pool of candidates.	Brands can focus on matching their ads to audience interests and improving the relevance of creatives that lead users to WhatsApp.
2. Better handling of many ad creatives	Its improved retrieval architecture can process a much larger variety of ads efficiently, supporting automated advertising tools such as Advantage+.	Marketers can test different images, videos, offers and messages, then use campaign performance data to improve click-to-WhatsApp results.

Marketing conclusion: Brands should create diverse, high-quality creatives, test different offers, and measure meaningful outcomes such as qualified WhatsApp enquiries and completed orders—not just clicks. Andromeda does not guarantee improved results for every campaign.

5. AI and Automation Plan for a Social Media Agency in 2026

As a social media agency, I would use AI and automation tools to manage multiple client campaigns efficiently.

1. Content creation: Use ChatGPT to generate captions, hashtags, content calendars and ad copy for different clients.
2. Creative design: Use Canva AI to create branded posts, stories, reels and advertising creatives for Instagram and Facebook.
3. WhatsApp automation: Use WATI or AiSensy to send welcome messages, answer FAQs and collect customer enquiries automatically.
4. Campaign management: Use Meta Ads Manager and AI-powered recommendations to test creatives, optimize targeting and manage advertising budgets.

5. Scheduling: Use Buffer or Meta Business Suite to schedule posts across Facebook and Instagram consistently.
6. Performance reporting: Use Google Sheets and analytics tools to track reach, engagement, clicks, leads, conversions and cost per lead.
7. Human supervision: Review AI-generated content, protect customer data and personally handle complex complaints or important client decisions.

Conclusion: Combining AI with automation helps a social media agency save time, maintain consistent communication, improve campaign performance and manage several clients more effectively.

Digital Marketing Assignment

Session – 21

1. Campaign objective and target audience

App chosen: Zomato

Campaign name: Your Cravings, Delivered

Objective: Increase Zomato app downloads and first-time food orders by 20% over four weeks using engaging social media posts, food reels, polls, and promotional content.

Target audience: People aged 18–30, especially college students and young professionals living in urban areas. The campaign targets people interested in food trends, restaurant offers, online food delivery, and convenient ordering.

---

2. Seven-day content calendar

Day	Platform	Post type	Time	Content idea
Monday	Instagram	Reel	12:30 PM	Show three popular lunch options and ask viewers to choose their favourite.
Tuesday	Instagram	Story poll	7:00 PM	Ask users to vote between pizza, burgers, and biryani.
Wednesday	Facebook	Image carousel	1:00 PM	Highlight popular local restaurants and their signature dishes.
Thursday	X (Twitter)	Poll	6:30 PM	Ask followers to vote for their ultimate comfort food.
Friday	Instagram	Reel	8:00 PM	Promote weekend cravings with a call-to-action to order through Zomato.
Saturday	Facebook	Short	12:00	Show friends enjoying a meal and

		video	PM	encourage people to share their favourite dishes.
Sunday	Instagram	Story	7:30 PM	Share weekly food recommendations and encourage users to explore nearby restaurants.

Posting times are suggested starting points and can be adjusted using audience engagement data.

---

3. Sample social media posts

Instagram post

 Lunch plans? Sorted!

Discover your next favourite bite and get it delivered with Zomato. From delicious burgers to cheesy pizzas, satisfy your cravings in just a few taps!

 Open Zomato and explore your food favourites today!

#Zomato #FoodieFinds #LunchGoals #FoodDelivery #FoodLovers

X (Twitter) post

One question: What's your ultimate comfort food?

Pizza, burgers, or biryani? Vote below and discover your next favourite meal on Zomato! ❤

#Foodies #CravingTime #Zomato

---

4. Three key success metrics

1. Reach: Measures how many unique people see the campaign and helps evaluate brand awareness.
2. Click-through rate (CTR): Measures the percentage of impressions that result in clicks, indicating whether posts encourage action.
3. App installs: Tracks the number of app downloads attributed to the campaign and measures progress toward the main objective.

---

5. Three-slide presentation and PDF

I've prepared both a three-slide PowerPoint presentation and its PDF version, covering the objective and audience, seven-day content plan, sample posts, and success metrics.

0-7819893994620383602.pdf
